

**DESCRIPTION**

The LX5107 is a nine-line active terminator for the SCSI parallel bus. This SCSI standard recommends active termination at both ends of the SCSI bus.

During disconnect mode, the LX5107 requires a meager 30 $\mu$ A of supply current while offering only 3.0pF of output capacitance. To enter this low-power mode, the disconnect pin should be driven low thereby disconnecting the terminating resistors and placing the internal low dropout regulator into low-power mode. In disconnect mode, each termination line presents a high impedance to the SCSI bus with the overall effect being to preserve high signal integrity and yield subsequent reliable, error free communications.

During normal operation, the LX5107 consumes only 600 $\mu$ A of current which is

the lowest enabled supply current of any terminator available on the market today. Linfinity's proprietary BiCMOS low dropout regulator architecture enables this unique and very efficient operating characteristic.

The LX5107 also offers a precisely trimmed channel output current specified to a 5% tolerance. The maximum value of the output current is trimmed as closely as possible to the SCSI standard maximum specification to give the highest possible noise margin for fast SCSI operation. In addition, the LX5107 sinks up to 50mA of current making it compatible with today's fast active negation drivers.

The LX5107 is a superior, pin-for-pin replacement for a variety of industry products such as the DS2107S and DS21S07A.

**KEY FEATURES**

- 3.0pF OUTPUT CAPACITANCE DURING DISCONNECT
- 30 $\mu$ A SUPPLY CURRENT IN DISCONNECT MODE
- 600 $\mu$ A SUPPLY CURRENT DURING NORMAL OPERATION
- 50mA SINK CURRENT FOR ACTIVE NEGATION
- LOGIC COMMAND DISCONNECTS ALL TERMINATION LINES
- CURRENT LIMIT AND THERMAL PROTECTION
- COMPATIBLE WITH SCSI 1, 2 AND 3 STANDARDS
- MEETS SCSI HOT PLUGGING CAPABILITY
- CONSULT FACTORY FOR APPLICATION TEST REPORT: 5107TR

**IMPORTANT:** For the most current data, consult Linfinity's web site: <http://www.linfinity.com>.

**PACKAGE ORDER INFORMATION**

<b>T<sub>J</sub> (°C)</b>	<b>DW</b> Plastic SOWB 16-pin	<b>PWP</b> Plastic TSSOP 20-pin, Power
<b>0 to 70</b>	<b>LX5107CDW</b>	<b>LX5107CPWP</b>

Note: All surface-mount packages are available in Tape & Reel. Append the letter "T" to part number. (i.e. LX5107CDWT)

#### ABSOLUTE MAXIMUM RATINGS (Note 1)

TermPwr Voltage .....	+7V
Signal Line Voltage .....	0V to +7V
Regulator Output Current .....	0.5A
Operating Junction Temperature	
Plastic (DW, PW Packages) .....	150°C
Storage Temperature Range .....	-65°C to 150°C
Lead Temperature (Soldering, 10 seconds) .....	300°C

Note 1. Exceeding these ratings could cause damage to the device. All voltages are with respect to Ground. Currents are positive into, negative out of the specified terminal.

#### THERMAL DATA

##### DW PACKAGE:

<b>THERMAL RESISTANCE-JUNCTION TO AMBIENT, <math>\theta_{JA}</math></b>	<b>95°C/W</b>
---	---------------

##### PWP PACKAGE:

<b>THERMAL RESISTANCE-JUNCTION TO AMBIENT, <math>\theta_{JA}</math></b>	<b>83°C/W</b>
---	---------------

Junction Temperature Calculation:  $T_J = T_A + (P_D \times \theta_{JA})$ .

The  $\theta_{JA}$  numbers are guidelines for the thermal performance of the device/pc-board system. All of the above assume no ambient airflow.

POWER UP / POWER DOWN FUNCTION TABLE

## PRODUCTION DATA SHEET

## RECOMMENDED OPERATING CONDITIONS (Note 2)

Parameter	Symbol	Recommended Operating Conditions			Units
		Min.	Typ.	Max.	
TermPwr Voltage	$V_{TERM}$	4		5.25	V
Signal Line Voltage		0		5	V
Disconnect Input Voltage		0		$V_{TERM}$	V
Output Capacitor on $V_{REF}$		2.2			$\mu$ F
Operating Virtual Junction Temperature Range					
LX5107C		0		70	$^{\circ}$ C

Note 2. Range over which the device is functional.

## ELECTRICAL CHARACTERISTICS

(Unless otherwise specified, these specifications apply over the operating ambient temperature range of  $0^{\circ}\text{C} \leq T_A \leq 70^{\circ}\text{C}$ . TermPwr = 4.75V, Disconnect = Open. Low duty cycle pulse testing techniques are used which maintains junction and case temperatures equal to the ambient temperature.)

Parameter	Symbol	Test Conditions	LX5107			Units
			Min.	Typ.	Max.	
<b>Supply Current Section</b>						
TermPwr Supply Current		All term lines = Open		0.6	2.0	mA
		All term lines = 0.5V		194	210	mA
