

iPAQ Microportable Projector MP1410

The Compaq projector designed to fit any budget

At a glance

- > Weighs only 1.95 kg
- > 950 lumens of brightness
- > SVGA resolution
- > Plug and present
- > Integrated multimedia features
- > Optional Home Theater Kit

This affordable projector is designed for portability while showcasing the most desirable features of more bulky, expensive projectors.

The *iPAQ* Microportable Projector MP1410 is for mobile professionals who deliver presentations from a notebook PC to small and medium sized audiences. And beyond the business professional market, consumers will use the *iPAQ* MP1410 and the optional Home Theater Kit to enrich their video and DVD movie experience at home.

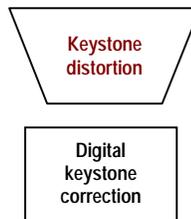

The *iPAQ* MP1410 is particularly well suited for middle and upper managers, sales executives, and training specialists. It's the perfect companion for "road warriors" who appreciate innovations that lighten their load while travelling and impress their audiences upon arrival.

The *iPAQ* MP1410 is so small and light, it can be carried in a bag together with a notebook PC. And the price is so affordable, even companies with today's lean budgets can easily purchase this technology.

What's Special About This Product?

Small and light

The *iPAQ* Microportable Projector MP1410 is amazingly compact, with a weight of only 1.95 kg and smaller than an A4 sheet of paper. It is only 2868 cm³ in volume and can easily fit into most notebook carrying cases along with the notebook. The projector boasts a sophisticated, sleek tower design that minimizes the keystone distortion found in other projectors with a lower lens height.

Easy to use

When the *iPAQ* MP1410 is first attached to a PC, it detects the signal and automatically makes all necessary adjustments. The PixelWorks processor provides Plug and Present and Autosynchronization capabilities, so technical difficulties and tedious display and resolution adjustments are not a worry. For additional fine-tuning, the *iPAQ* MP1410 also features an intuitive onscreen menu for easy and quick image adjustments. A tripod can be easily attached for projection convenience.

Bright, clear, and powerful

The *iPAQ* MP1410 provides a generous 950 lumens of brightness and 800x600 SVGA graphics onscreen for crisp images. The design includes leading technologies like Texas Instruments' DLP, Pixelworks' graphics imager, and Osram's lamp excellence for optimal image clarity, user flexibility, and ease of use"

Durable

The *iPAQ* MP1410 is extremely rugged, thanks to its sturdy magnesium casing; stronger than plastic but much lighter. And of course, the *iPAQ* MP1410 bears the Compaq name, which means it is subjected to the same rigorous testing that Compaq products like Evo notebook PCs experience. Compaq backs the *iPAQ* Microportable Projector MP1410 with a one-year worldwide limited warranty with Advanced Unit Replacement Program available in some countries. Even the lamp has a 180-day warranty – double the industry average.

Versatile

The *iPAQ* Microportable Projector MP1410 works with almost any notebook PC. It can display video from a VGA or DFP source, like the *iPAQ* Pocket PC equipped with a Voyager VGA adapter and PC Card Expansion Pack, or a DVD drive on a notebook PC. Finally, it can display video and S-video from DVD players, camcorders, and VCRs with the optional *iPAQ* Home Theater Kit HT110 or the optional *iPAQ* Multimedia Adapter Kit MMA110.

Home Theater Kit HT110
