

TC74HC375AP, TC74HC375AF, TC74HC375AFN**4-BIT D TYPE LATCH**

The TC74HC375A is a high speed CMOS D-TYPE LATCH fabricated with silicon gate C²MOS technology.

It achieves the high speed operation similar to equivalent LSTTL while maintaining the CMOS low power dissipation.

It contains two groups of 2-bit latches controlled by an enable input (G1 · 2 or G3 · 4) and each group can be used in different circuits.

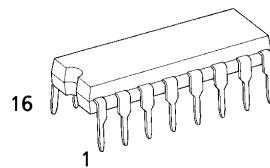

Data applied to the data inputs are transferred to the Q and \bar{Q} outputs when the enable inputs is high. When the enable input is low, the outputs are not affected.

All inputs are equipped with protection circuits against static discharge or transient excess voltage.

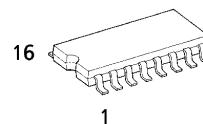

FEATURES :
