Under Developing

STRUCTURE Silicon Monolithic Integrated Circuit

PRODUCT SERIES 3ch Stepping Motor Driver

TYPE BD6878GUW

FEATURES • Built in 2 Full-ON Drivers

· Built in 1 Linear Constant-Current Driver

● Absolute maximum ratings (Ta=25°C)

Parameter	Symbol	Limit	Unit	
Power supply voltage	VCC	-0.5 to +7.0	V	
Motor power supply voltage	y voltage VM -0.5 to +7.0		V	
Control input voltage	VIN	-0.5 to VCC+0.5	V	
Power dissipation	Pd	619 ^{#1}	mW	
Operating temperature range	Topr	-25 to +85	°C	
Junction temperature	Tjmax	125	°C	
Storage temperature range	Tstg	-55 to +125	°C	
H-bridge output current	lout	-800 to +800*2	mA/ch	

^{*1} Reduced by 6.19mW/°C over 25°C, when mounted on a glass epoxy board (114.3mm x 76.2mm x 1.6mm).

●Operating Conditions (Ta=-25°C to +85°C)

Parameter	Symbol	Min.	Тур.	Max.	Unit
Power supply voltage	VCC	2.5	3.0	5.5	٧
Motor power supply voltage	VM	2.5	5.0	5.5	٧
Control input voltage	VIN	0	-	VCC	٧
H-bridge output current	lout	-	-	±500*3	mA/ch

Must not exceed Pd or ASO.

The product described in this specification is a strategic product (and/or service) subject to COCOM regulations. It should not be exported without authorization from the appropriate government authorities.

This product isn't designed for protection against radioactive rays.

^{**2} Must not exceed Pd, ASO, or Tjmax of 125°C.

6C	IN1B	6F	N.C.

●BD6878GUW Electrical Characteristics (Unless otherwise specified, Ta=25°C, VCC=3.0V, VM=5.0V)

		Inless otherwise specified, Ta=25 Target Limit		Unit	Conditions	
Parameter	Symbol	Min.	Тур.	Max.	Unit	Conditions
Overall						
Circuit current during standby operation	ICCST		0		μA	PS=L
Circuit current	ICC		1.2		mA	PS=H with no signal
Power-saving						
High level input voltage	VPSH				V	
Low level input voltage	VPSL				V	
High level input current	IPSH		30		μA	PS=3V
Low level input current	IPSL		0		μA	PS=0V
Control input						
High level input voltage	VINH		-		V	IN1A~IN3B, SEL, BRAKE1~2, VLIMS
Low level input voltage	VINL		-		V	IN1A~IN3B, SEL, BRAKE1~2, VLIMS
High level input current	IINH		30		μА	IN1A~IN3B, SEL, BRAKE1~2, VLIMS; VIN=3V
Low level input current	IINL		0		μА	IN1A~IN3B, SEL, BRAKE1~2, VLIMS; VIN=0V
Pull-down resistor	RIN		100		kΩ	IN1A~IN3B, SEL, BRAKE1~2, VLIMS
UVLO		_			-	
UVLO voltage	VUVLO		•		V	
Full-ON Drive block (ch1	and ch2)			_		
Output ON-Resistance	RON		1.2		Ω	lo=±400mA on high and low sides in total
Turn-on time	ton		0.6		μs	With 20Ω load
Turn-off time	toff		0.08		μs	With 20Ω load
Rise time	tr		0.15		μs	With 20Ω load
Fall time	tf		0.03		μs	With 20Ω load
Linear Constant-Current	Drive block	(ch3)				
Output ON-Resistance	RON		1.0		Ω	lo=±400mA on high and low sides in total
VREF output voltage	VREF		0.90		V	lout=0~1mA
Output limit voltage 1	VOL1		300		mV	RNF=1.5Ω, VLIM=0.3V
Output limit voltage 2	VOL2		450		mV	RNF=1.5Ω, VLIM=0.45V
Output limit voltage 3	VOL3		200	İ	mV	RNF=0.5Ω, VLIM=0.2V
Turn-on time	ton		1.0		μs	With 10Ω load
Turn-off time	toff		0.1		μs	With 10Ω load
Rise time	tr		0.5		μs	With 10Ω load
Fall time	tf		0.07	1	μs	With 10Ω load

Operation Notes

(1) Absolute maximum ratings

Use of the IC in excess of absolute maximum ratings such as the applied voltage or operating temperature range (Topr) may result in IC damage. Assumptions should not be made regarding the state of the IC (short mode or open mode) when such damage is suffered. The implementation of a physical safety measure such as a fuse should be considered when use of the IC in a special mode where the absolute maximum ratings may be exceeded is anticipated.

(2) Power supply lines

Regenerated current may flow as a result of the motor's back electromotive force. Insert capacitors between the power supply and ground pins to serve as a route for regenerated current. Determine the capacitance in full consideration of all the characteristics of the electrolytic capacitor, because the electrolytic capacitor may loose some capacitance at low temperatures. If the connected power supply does not have sufficient current absorption capacity, regenerative current will cause the voltage on the power supply line to rise, which combined with the product and its peripheral circuitry may exceed the absolute maximum ratings. It is recommended to implement a physical safety measure such as the insertion of a voltage clamp diode between the power supply and GND pins.

(3) Ground potential

Ensure a minimum GND pin potential in all operating conditions.

(4) Setting of heat

Use a thermal design that allows for a sufficient margin in light of the power dissipation (Pd) in actual operating conditions.

(5) Actions in strong magnetic field

Use caution when using the IC in the presence of a strong magnetic field as doing so may cause the IC to malfunction.

(6) ASO

When using the IC, set the output transistor for the motor so that it does not exceed absolute maximum ratings or ASO.

(7) Thermal shutdown circuit

This IC incorporates a TSD (thermal shutdown) circuit (TSD circuit). If the temperature of the chip reaches the following temperature, the motor coil output will be opened. The thermal shutdown circuit (TSD circuit) is designed only to shut the IC off to prevent runaway thermal operation. It is not designed to protect the IC or guarantee its operation. Do not continue to use the IC after operating this circuit or use the IC in an environment where the operation of this circuit is assumed.

TSD ON temperature [°C]	Hysteresis temperature [°C]		
(Typ.)	(Typ.)		
150	25		

(8) Ground Wiring Pattern

When using both small signal and large current GND patterns, it is recommended to isolate the two ground patterns, placing a single ground point at the application's reference point so that the pattern wiring resistance and voltage variations caused by large currents do not cause variations in the small signal ground voltage. Be careful not to change the GND wiring pattern of any external components, either.

Notes

- No technical content pages of this document may be reproduced in any form or transmitted by any
 means without prior permission of ROHM CO.,LTD.
- The contents described herein are subject to change without notice. The specifications for the
 product described in this document are for reference only. Upon actual use, therefore, please request
 that specifications to be separately delivered.
- Application circuit diagrams and circuit constants contained herein are shown as examples of standard
 use and operation. Please pay careful attention to the peripheral conditions when designing circuits
 and deciding upon circuit constants in the set.
- Any data, including, but not limited to application circuit diagrams information, described herein are intended only as illustrations of such devices and not as the specifications for such devices. ROHM CO.,LTD. disclaims any warranty that any use of such devices shall be free from infringement of any third party's intellectual property rights or other proprietary rights, and further, assumes no liability of whatsoever nature in the event of any such infringement, or arising from or connected with or related to the use of such devices.
- Upon the sale of any such devices, other than for buyer's right to use such devices itself, resell or
 otherwise dispose of the same, no express or implied right or license to practice or commercially
 exploit any intellectual property rights or other proprietary rights owned or controlled by
- ROHM CO., LTD. is granted to any such buyer.
- Products listed in this document are no antiradiation design.

The products listed in this document are designed to be used with ordinary electronic equipment or devices (such as audio visual equipment, office-automation equipment, communications devices, electrical appliances and electronic toys).

Should you intend to use these products with equipment or devices which require an extremely high level of reliability and the malfunction of with would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

About Export Control Order in Japan

Products described herein are the objects of controlled goods in Annex 1 (Item 16) of Export Trade Control Order in Japan.

In case of export from Japan, please confirm if it applies to "objective" criteria or an "informed" (by MITI clause) on the basis of "catch all controls for Non-Proliferation of Weapons of Mass Destruction.
