

The DG - 105 carrying a unique hysteresis transistor (BAMBIT) developed by KODENSHI CORP. facilitates digital output by means of two leads. This digital photointerrupter, because of its ultra - compact size, requires little space.

FEATURES

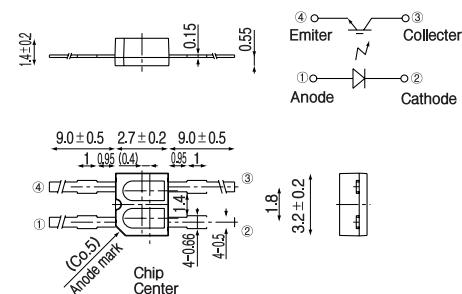

- DIGITAL OUTPUT : directly connect to a microcomputer digital port.
- HYSTERESIS : stable against chattering of the object
- HIGH-SPEED RESPONSE : faster than phototransistor type
- Setting easy

APPLICATIONS

- Detection of paper or marks
- Detection of high-speed object
- Detection of bar codes
