

High speed thermal printhead (8 dots / mm)

NF2002-VA10A

The NF2002-VA10A is a flat thin-film thermal printhead capable of printing speeds up to 12 inch / second, and suited for general purpose compact printers as well as label printers.

●Applications

- Bar code label printers
- Ticket printers
- General purpose compact printers

●Features

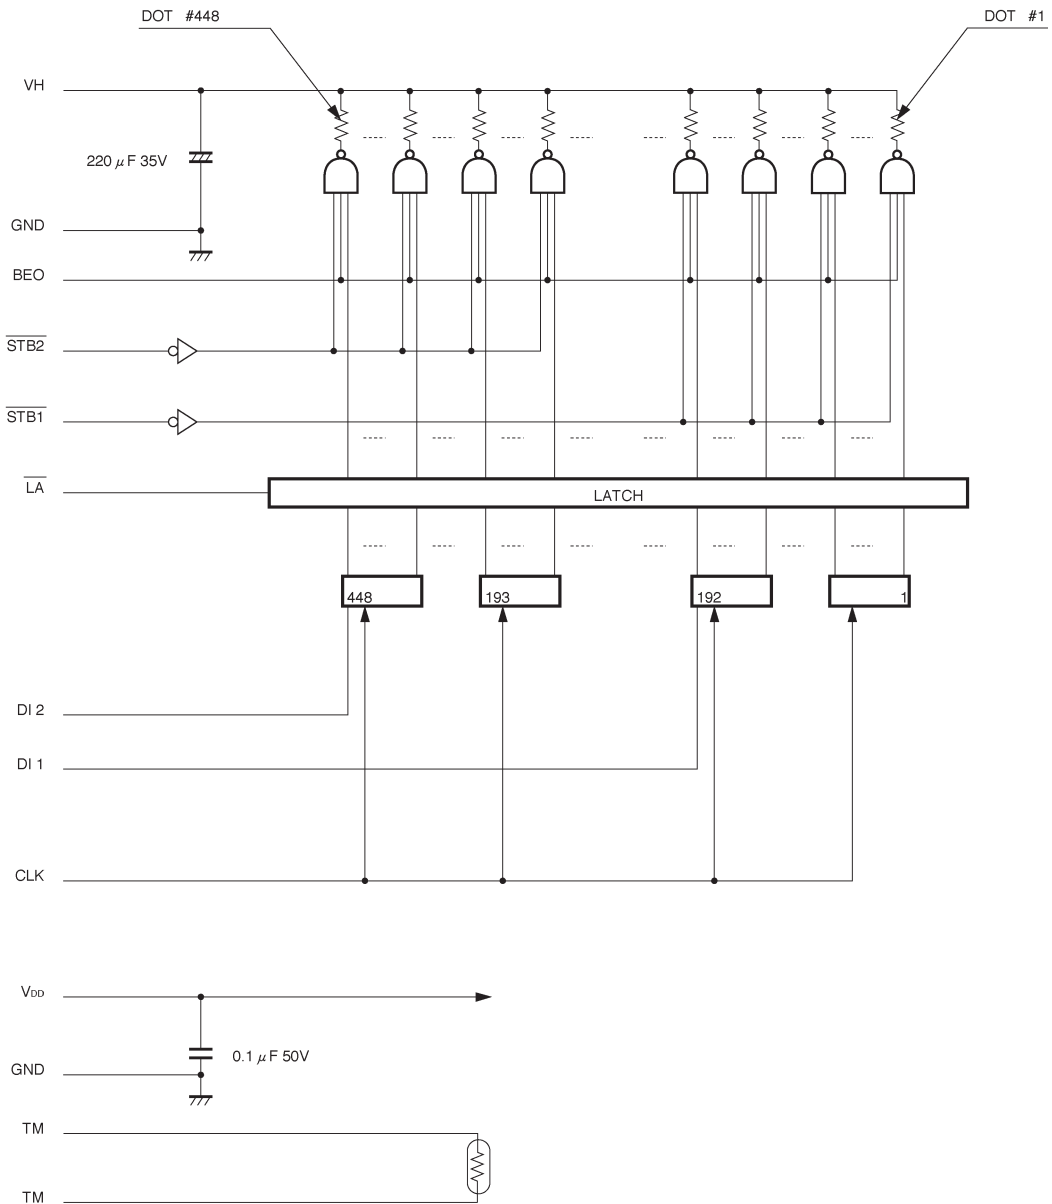

- 1) Special glazed components for high speed, high quality printing.
- 2) High speed clock to facilitate external heat history control.
- 3) Using a hard conductive film as a protective film on the heating element offers excellent resistance to electrostatic damage.
- 4) Compatible with the NF3002-VA10A (300 dpi) in mechanical specifications, to facilitate the making of a series of printers.

●External dimensions (Units: mm)

Note: No heat history control function inside the thermal printhead. External heat history control is required for high speed printing.

●Characteristics

Parameter	Symbol	Typical	Unit
Effective printing width	—	56	mm
Dot pitch	—	0.125	mm
Total dot number	—	448	dots
Average resistance value	R _{ave}	550	Ω
Applied voltage	V _H	24	V
Applied power	P _O	0.923	W / dot
Print cycle	SLT	0.98	ms
Pulse width	T _{ON}	0.26	ms
Maximum number of dots energized simultaneously	—	448	dots
Maximum clock frequency	—	10	MHz
Maximum roller diameter	—	20	mm
Running life / pulse life	—	50 / 10 ⁸	km / pulses
Operating temperature	—	5~45	°C
