

HD74AC182

Carry Lookahead Generator

REJ03D0258-0200Z (Previous ADE-205-378 (Z)) Rev.2.00 Jul.16.2004

Description

The HD74AC182 is a high-speed carry lookahead generator. It is generally used with the HD74AC181 or HD74AC381 4-bit arithmetic logic unit to provide high-speed lookahead over word lengths of more than four bits.

Features

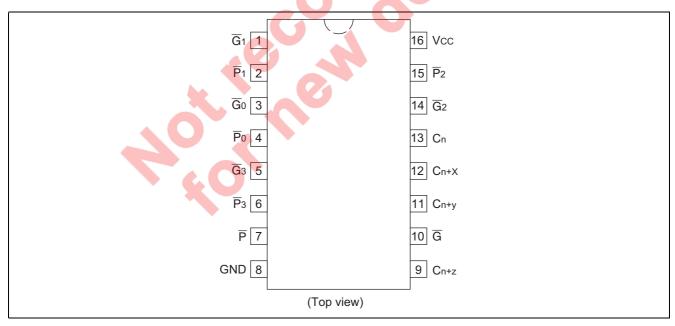

- Outputs Source/Sink 24 mA
- Ordering Information

Part Name	Package Type	Package Code	Package Abbreviation	Taping Abbreviation (Quantity)
HD74AC182FPEL	SOP-16 pin (JEITA)	FP-16DAV	FP	EL (2,000 pcs/reel)
HD74AC182RPEL	SOP-16 pin (JEDEC)	FP-16DNV	RP	EL (2,500 pcs/reel)

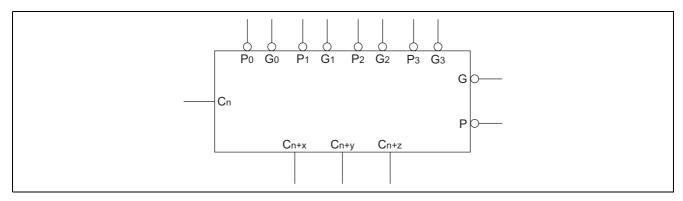

Notes: 1. Please consult the sales office for the above package availability.

2. The packages with lead-free pins are distinguished from the conventional products by adding V at the end of the package code.

Pin Arrangement

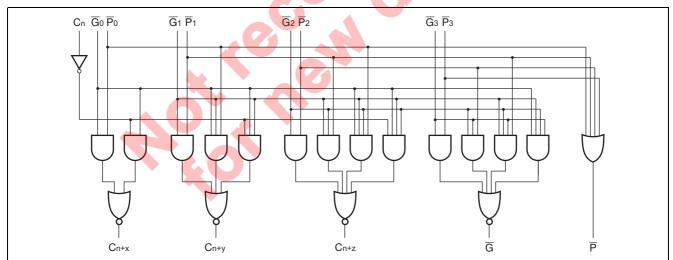

Logic Symbol

Pin Names

Cn	Carry Input
\overline{G}_0 , \overline{G}_2 \overline{G}_1 \overline{G}_3 \overline{P}_0 , \overline{P}_1 \overline{P}_2 \overline{P}_3	Carry Generate Inputs (Active Low)
$\overline{\mathbf{G}}_{1}$	Carry Generate Input (Active Low)
$\overline{\mathbf{G}}_3$	Carry Generate Input (Active Low)
$\overline{P}_0, \overline{P}_1$	Carry Propagate Inputs (Active Low)
\overline{P}_2	Carry Propagate Input (Active Low)
\overline{P}_3	Carry Propagate Input (Active Low)
$\frac{C_{n+x}}{\overline{G}}$ to C_{n+z}	Carry Outputs
\overline{G}	Carry Generate Output (Active Low)
\overline{P}	Carry Propagate Output (Active Low)

Logic Diagram

Please note that this diagram is provided only for the understanding of logic operations and should not be used to estimate propagation delays.

Functional Description

The HD74AC182/HD74ACT182 carry lookahead generator accepts up to four pairs of Active Low Carry Propagate (\overline{P}_0) to \overline{P}_3) and Carry Generate (\overline{G}_0) to \overline{G}_3) signals and an Active High Carry input (Cn) and provides anticipated Active High carries $(C_{n+x}, C_{n+y}, C_{n+z})$ across four groups of binary adders. The HD74AC182/HD74ACT182 also has Active Low Carry Propagate (\overline{P}) and Carry Generate (\overline{G}) outputs which may be used for further level of lookahead. The logic equations provided at the outputs are:

$$\begin{split} &C_{n+x}\!=G_0+P_0C_n\\ &C_{n+y}\!=G_1+P_1G_0+P_1P_0C_n\\ &C_{n+z}\!=\!G_2+P_2G_1+P_2P_1G_0+P_2P_1P_0C_n\\ &\overline{G}=\overline{G_3+P_3G_2+P_3P_2G_1+P_3P_2P_1G_0}\\ &\overline{P}=P_{\overline{3}}\overline{P_2P_1P_0} \end{split}$$

Also, the HD74AC182/HD74ACT182 can be used with binary ALUs in an active Low or active High input operand mode. The connections (Figure a) to and from the ALU to the carry lookahead generator are identical in both cases. Carries are rippled between lookahead blocks. The critical speed path follows the circled numbers. There are several possible arrangements for the carry interconnects, but all achieve about the same speed. A 28-bit ALU is formed by dropping the last HD74AC182/HD74ACT182.

Keep safety first in your circuit designs!

1. Renesas Technology Corp. puts the maximum effort into making semiconductor products better and more reliable, but there is always the possibility that trouble may occur with them. Trouble with semiconductors may lead to personal injury, fire or property damage.

Remember to give due consideration to safety when making your circuit designs, with appropriate measures such as (i) placement of substitutive, auxiliary circuits, (ii) use of nonflammable material or (iii) prevention against any malfunction or mishap.

Notes regarding these materials

1. These materials are intended as a reference to assist our customers in the selection of the Renesas Technology Corp. product best suited to the customer's application; they do not convey any license under any intellectual property rights, or any other rights, belonging to Renesas Technology Corp. or a third party.

2. Renesas Technology Corp. assumes no responsibility for any damage, or infringement of any third-party's rights, originating in the use of any product data, diagrams, charts, programs, algorithms, or circuit application examples contained in these materials, including product data, diagrams, charts, programs and algorithms represents information on products at the time of publication of these materials, and are subject to change by Renesas Technology Corp. without notice due to product improvements or other reasons. It is therefore recommended that customers contact Renesas Technology Corp. or an authorized Renesas Technology Corp. product distributor for the latest product information before purchasing a product listed herein.
