Panasonic ideas for life

NARROW-PITCH CONNECTORS FOR BOARD-TO-BOARD CONNECTION

NARROW PITCH (0.5mm) CONNECTORS P5 SERIES — P5KF —

Compliance with RoHS Directive

FEATURES

1. The connector is a two-piece structure and 0.5mm pitch.

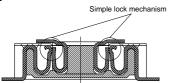

The product lineup consists of the mated height of 1.5mm, 2.0mm and 2.5mm.

2. Strong resistance to adverse environments! Utilizes

TDUGH CONTRET construction for high contact reliability.

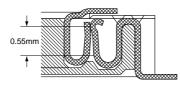

(See Page 6 for details of the structure)
3. Simple locking structure
Superior mating operation with click
feel to indicate that mating is

complete.

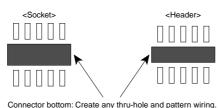

4. Mating length 0.55mm

While achieving a low profile of 1.5mm between PCBs, the effective mating length has been extended to ensure that there is some latitude in the mating.

5. The lower connector bottom surface construction prevents contact and shorts between the PCB and metal terminals.

This enables freedom in pattern wiring, helping to make PCB's smaller.

6. Automatic mounting inspection is facilitated by the gull-wing terminal

shape which makes mounting verification easy.

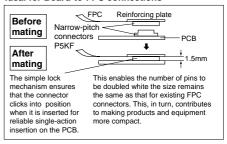

7. Connectors for inspection available

Connectors for inspection are available that are ideal for modular unit inspection and inspection in device assembly processes.

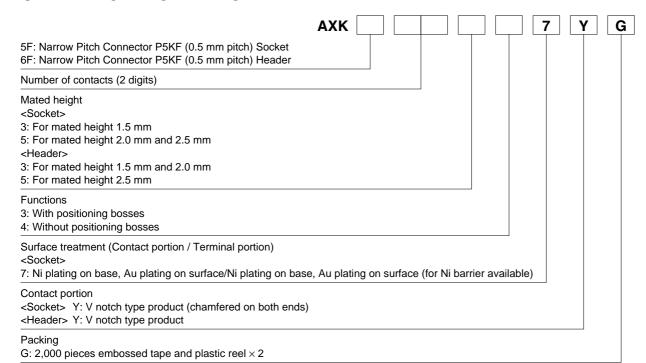

APPLICATIONS

Compact portable devices "Cellular phones, DVC, Digital cameras, etc"

Ideal for Board-to-FPC connections

	100	AXK5F00547YG	AXK6F00547YG	-		

Notes: 1. Regarding ordering units, During production: Please make orders in 1-reel units. Samples for mounting confirmation: Available in units of 50 pieces. Please consult us. (See "Regarding sample orders to confirm proper mounting" on page 150.) Samples: Small lot orders are possible. Please consult us.

2. The standard type comes without positioning bosses. Connectors with positioning bosses are available for on-demand production. For this type of connector, 9th

digit of the part no. changes from 4 to 3. e.g.

Mated height 1.5mm, 10 contacts for sockets: AXK5F10337YG

^{3.} The 11th digit "Y" in the socket/header part number indicates the connector has a V notch. (For details, please consult one of our sales offices.)
4. Previous non-*TDUGH CONTRET* types and current *TDUGH CONTRET* types are compatible for mating.

SPECIFICATIONS

1. Characteristics

Item		Specifications		Conditions			
	Rated current	0.5A/contact (Max. 10 A at total	contacts)				
	Rated voltage	60V AC/DC					
Electrical characteristics	Breakdown voltage	150V AC for 1 minute		Detection current: 1mA			
characteristics	Insulation resistance	Min. 1,000M Ω (initial)		Using 500V DC megger			
	Contact resistance			Based on the contact resistance measurement method specified by JIS C 5402.			
	Composite insertion force	Max. 0.981N/contacts × contact	ts (initial)				
Mechanical	Composite removal force	Min. 0.0588N/contacts × cor	ntacts				
characteristics	Contact holding force	Min. 0.981N/contact		Measuring the maximum force. As the contact is axially pull out.			
	Ambient temperature	–55°C to +85°C		No freezing at low temperatures			
	Soldering heat resistance	Max. peak temperature of 260°C (or of the PC board around the connection)		Infrared reflow soldering			
		300°C within 5 seconds, 350°C with	in 3 seconds	Soldering iron			
	Storage temperature	-55°C to +85°C (product onl -40°C to +50°C (emboss pa		No freezing at low temperatures. No dew condensation.			
Environmental characteristics	Thermal shock resistance (header and socket mated)	5 cycles, insulation resistance min. 100M Ω , contact resistance max. 90m Ω		Sequence 1. –55_3°C, 30 minutes 2. ~, Max. 5 minutes 3. 85*3°C, 30 minutes 4. ~, Max. 5 minutes			
	Humidity resistance (header and socket mated)	120 hours, insulation resistance n contact resistance ma	,	Bath temperature 40±2°C, humidity 90 to 95% R.H.			
	Saltwater spray resistance (header and socket mated)	24 hours, insulation resistance n contact resistance ma		Bath temperature 35±2°C, saltwarter concentration 5±1%			
	H ₂ S resistance (header and socket mated)			Bath temperature 40±2°C, gas concentration 3±1 ppm, humidity 75 to 80% R.H.			
Lifetime characteristics	Insertion and removal life	50 times		Repeated insertion and removal speed of max. 200 times/hours			
Unit weight		Mated height 1.5mm, 20 contacts; S Header: 0.04g	ocket: 0.06g				

2. Material and surface treatment

Part name	Material	Surface treatment
Molded portion	LCP resin (UL94V-0)	_
Contact/Post	Copper alloy	Contact portion: Ni plating on base, Au plating on surface Terminal portion: Ni plating on base, Au plating on surface (Except for thick of terminal) The section close to the soldering portion has a nickel barrier. (The nickel base is exposed.)

Connector orientation with respect to direction of progress of embossed tape

CONNECTOR FOR INSPECTION USAGE APPLICATIONS WITH 3,000 INSERTION AND REMOVAL TIMES

NARROW PITCH CONNECTOR P5KF (0.5 mm PITCHES) FOR INSPECTION USAGE

Socket

FEATURES

1. 3,000 insertion and removals (when as recommended)

- 2. Same external dimensions and foot pattern as standard type.
- 3. Improved mating

Insertion and removal have become easier due to a reduction in the mating retention force required by the simple locking structure and also in the amount of force needed for insertion and removal. (We cannot warrant anything regarding mating retention.)

APPLICATIONS

Ideal for module unit inspection and equipment assembly inspection

Compliance with RoHS Directive

Socket	Without positioning bosses	AXK5FE**46G	пеасег	Without positioning bosses	AXK6FE**46G

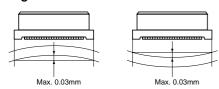

Note: When placing an order, substitute the "*" (asterisk) in the above part number with the number of contacts for the required connector.

NOTES

1. As shown below, excess force during insertion may result in damage to the connector or removal of the solder. Please be careful. Also, to prevent connector damage please confirm the correct position before mating connectors.

2. Keep the PC board warp no more than 0.03 mm in relation to the overall length of the connector.

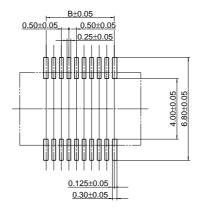

3. PC Boards and Recommended Metal Mask Patterns

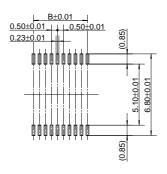

Connectors are mounted with high density, with a pitch interval of 0.4 to 0.5 mm. It is therefore necessary to make sure that the right levels of solder are used, in order to reduce solder bridge and other issues. The figures to the right are recommended metal mask patterns. Please use them as a reference.

Socket

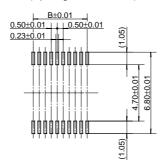

Recommended PC board pattern (TOP VIEW)

Recommended metal mask pattern Metal mask thickness: Here, 150 μm (Opening area ratio: 56%)

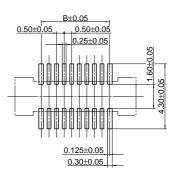

Recommended metal mask pattern Metal mask thickness: Here, 120 μm (Opening area ratio: 69%)
