

T-74-0501

## Monolithic Integrated Circuit

**Application:** Dual Low voltage Power Amplifier, especially for portable radios and cassette players

### Features:

- Supply voltage range 1.8 V to 10 V
- Low crossover distortion
- Very low radiation due to low cut-off frequency
- Low quiescent current
- Stereo configuration
- Audio output power 2x0.7 W

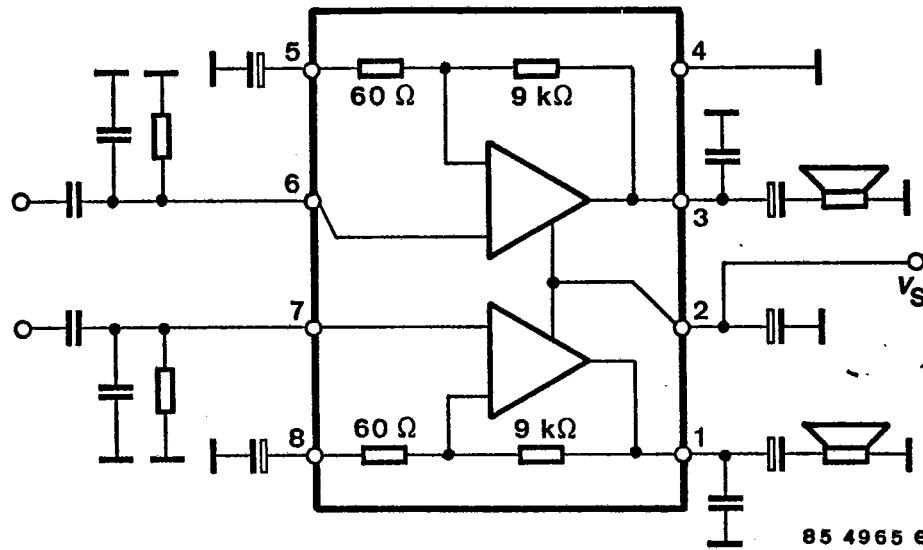

Fig.1 Block diagram and pin connections

**Absolute maximum ratings**

Reference point Pin 4, unless otherwise specified

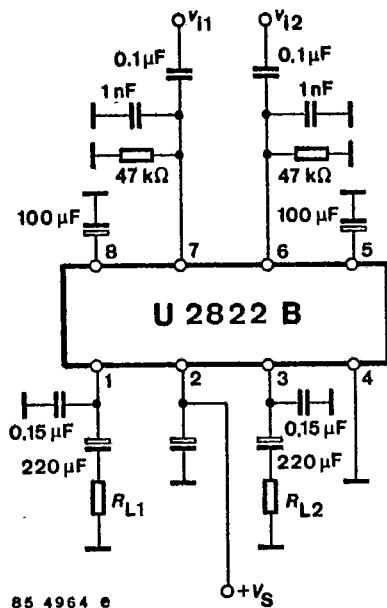

|   |           |            |                  |
|---|-----------|------------|------------------|
| Supply voltage                                    | $V_S$     | 10         | V                |
| Power dissipation<br>$T_{amb} = 50^\circ\text{C}$ | $P_{tot}$ | 1          | W                |
| Junction temperature                              | $T_J$     | 150        | $^\circ\text{C}$ |
| Storage temperature range                         | $T_{stg}$ | -25...+150 | $^\circ\text{C}$ |

| Thermal resistance |  |            | Min. | Typ. | Max. |     |
|--------------------|--|------------|------|------|------|-----|
| Junction ambient   |  | $R_{thJA}$ |      |      | 100  | K/W |

**Electrical characteristics** $V_S = 4.5 \text{ V}$ ,  $T_{amb} = 25^\circ\text{C}$ , reference point Pin 4, unless otherwise specified

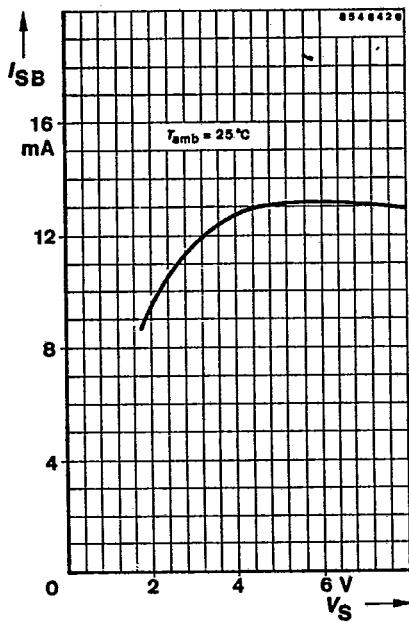

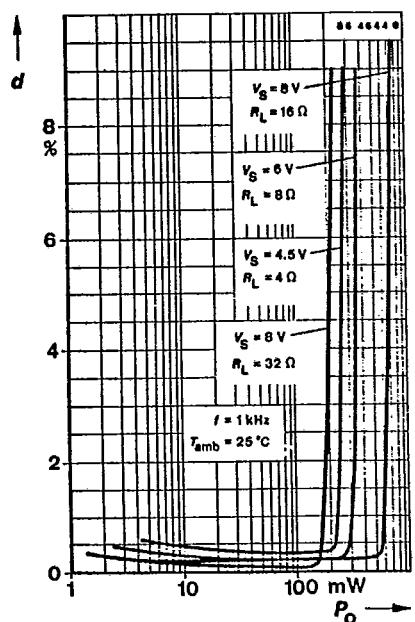

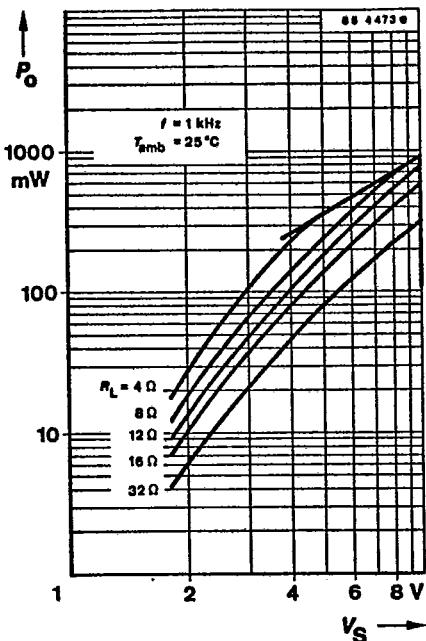

|  |                                       |                               |     |     |    |               |
|--|---------------------------------------|-------------------------------|-----|-----|----|---------------|
