

**STH****SITECH SEMICONDUCTORS CO., LIMITED****SH7496****5W+5W AMPLIFIER WITH DC VOLUME CONTROL**

- 5+5W OUTPUT POWER  
 $R_L = 8\Omega$  @ THD = 10%  $V_{CC} = 22V$
- ST-BY AND MUTE FUNCTIONS
- LOW TURN-ON TURN-OFF POP NOISE
- LINEAR VOLUME CONTROL DC COUPLED WITH POWER OP. AMP.
- NO BOUCHEROT CELL
- NO ST\_BY RC INPUT NETWORK
- SINGLE SUPPLY RANGING UP TO 35V
- SHORT CIRCUIT PROTECTION
- THERMAL OVERLOAD PROTECTION
- INTERNALLY FIXED GAIN
- SOFT CLIPPING
- VARIABLE OUTPUT AFTER VOLUME CONTROL CIRCUIT
- MULTIWATT 15 PACKAGE

**MULTIPOWER BI50II TECHNOLOGY**

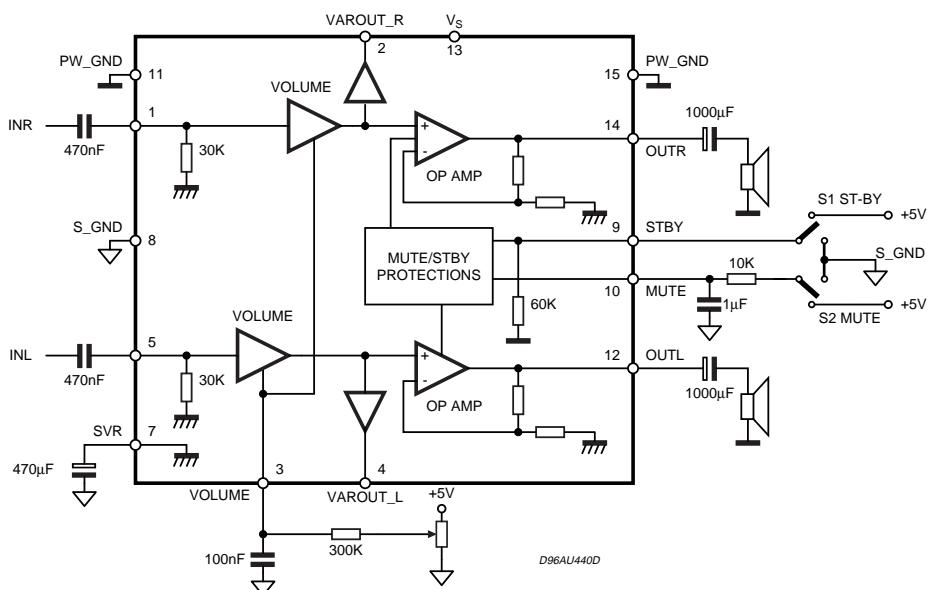

**Multiwatt 15**  
**ORDERING NUMBER: SH7496**

plifier assembled in the Multiwatt 15 package, specially designed for high quality sound, TV applications.

Features of the SH7496 include linear volume control Stand-by and Mute functions.

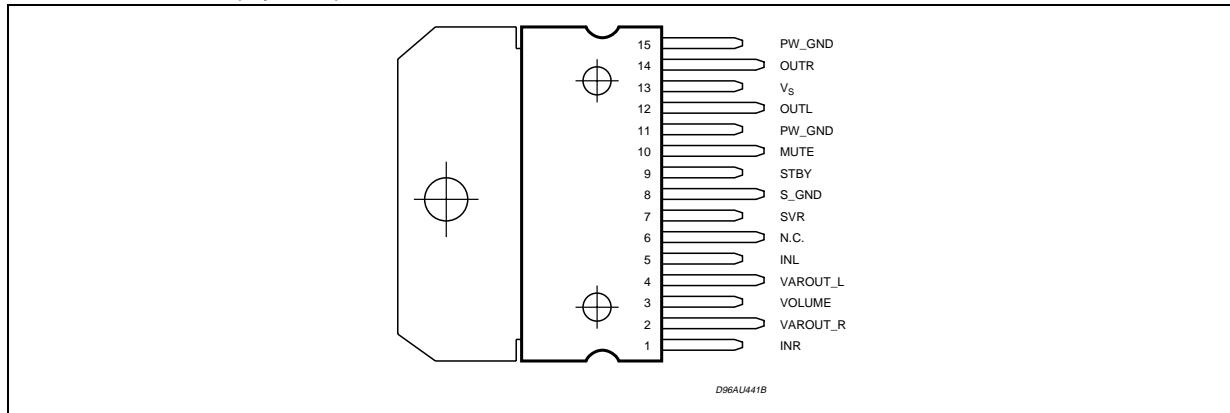

**DESCRIPTION**

The SH7496 is a stereo 5+5W class AB power am-

**SH7496****APPLICATION SUGGESTIONS**

The recommended values of the external components are those shown on the application circuit of figure 1. Different values can be used, the following table can help the designer.

| COMPONENT | SUGGESTION VALUE | PURPOSE                      | LARGER THAN SUGGESTION        | SMALLER THAN SUGGESTION        |
|-----------|------------------|------------------------------|-------------------------------|--------------------------------|
| R1        | 300K             | Volume Control Circuit       | Larger volume regulation time | Smaller volume regulation time |
| R2        | 10K              | Mute time constant           | Larger mute on/off time       | Smaller mute on/off time       |
| P1        | 50K              | Volume Control Circuit       |                               |                                |
| C1        | 1000µF           | Supply voltage bypass        |                               | Danger of oscillation          |
| C2        | 470nF            | Input DC decoupling          | Lower low frequency cutoff    | Higher low frequency cutoff    |
| C3        | 470nF            | Input DC decoupling          | Lower low frequency cutoff    | Higher low frequency cutoff    |
| C4        | 470µF            | Ripple rejection             | Better SVR                    | Worse SVR                      |
| C5        | 100nF            | Volume control time constant | Larger volume regulation time | Smaller volume regulation time |
| C6        | 1000µF           | Output DC decoupling         | Lower low frequency cutoff    | Higher low frequency cutoff    |
| C7        | 1µF              | Mute time constant           | Larger mute on/off time       | Smaller mute on/off time       |
| C8        | 1000µF           | Output DC decoupling         | Lower low frequency cutoff    | Higher low frequency cutoff    |
| C9        | 100nF            | Supply voltage bypass        |                               | Danger of oscillation          |

**Figure 1. USING ONLY THE MUTE FUNCTION**

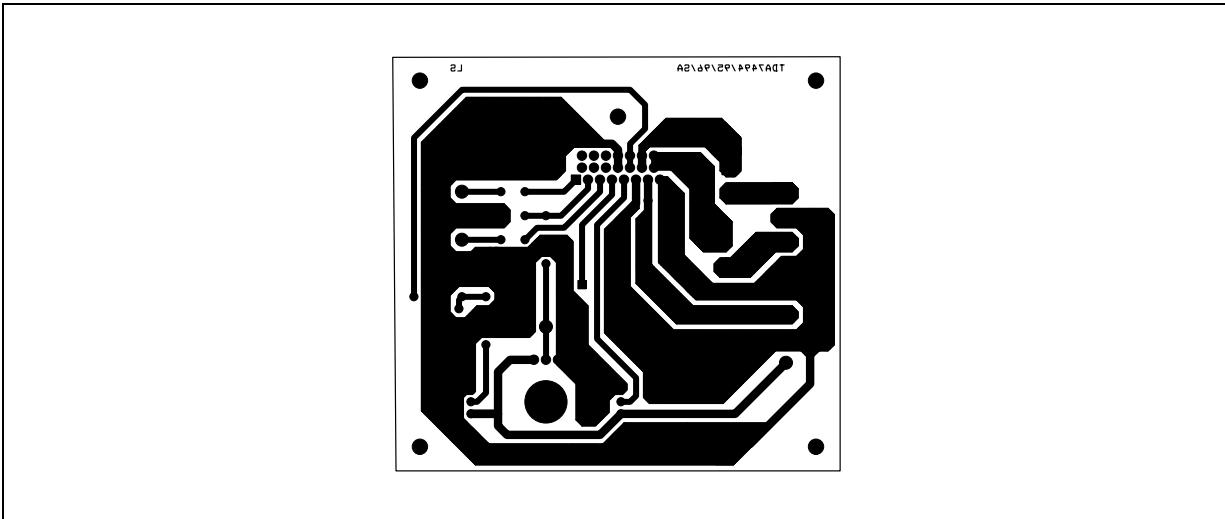

### USING ONLY THE MUTE FUNCTION

To simplify the application, the stand-by pin can be connected directly to Ground. During the ON/OFF transitions is recommended to respect the following conditions:

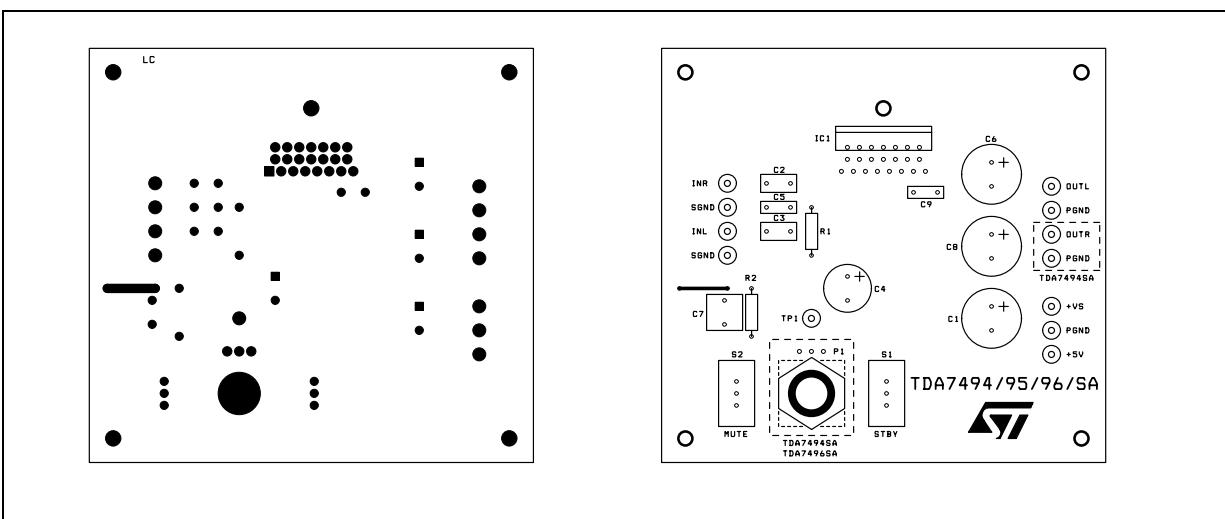

- At the turn-on the transition mute to mute - play must be made when the SVR pin is higher than 2.5V
- At the turn-off the SH7496 must be brought to mute from the play condition when the SVR pin is higher than 2.5V.
