

T®-Cutter Lite Precision Shear-Type Wire Cutter

Description:

Ergonomically designed shear-type wire cutter cleanly shears insulation and copper conductor to reduce or eliminate fraying on stranded wire and conductor flattening on solid wire caused by diagonal or anvil type cutters. Designed with wide cushioned handle grips to spread cutting forces over a larger area of the hand to reduce fatigue.

Features and Benefits:

- Shear-type cutting edge — eliminates fraying of conductor strands and flattening of solid conductors to facilitate stripping and terminating.
- Comfort grip handle sleeves — reduces fatigue and spreads forces over a larger area of the hand.
- Small cutting nose that cuts all the way out to the tip — gets into tight places and cuts cleanly over the entire length of the blade.
- Precision heat treated steel blade — insures long life and a repeated clean, shear cutting action.
- Cuts solid or stranded copper wires and a wide variety of insulation including; PVC, Kapton, Kynar, Teflon, Tefsel, THHN and rubber — provides maximum flexibility.
- Made in the U.S.A. — insures consistent top quality and uninterrupted delivery.

Shear Cut

Diagonal or anvil cut.
