

A leading manufacturer of communications test and measurement equipment since 1964, our commitment to reliability and high quality is backed by the industry's only "No Hassle" Warranty Program. Should any

Wavetek T-shaped meter require warranty service, your local dealer is authorized to replace it on the spot. No waiting, no freight charge, no hassle! This dedication to service excellence is supported by a worldwide network of Wavetek dealers and distributors.

Look to Wavetek

Wavetek is a world leader in DMMs and has the full range of portable instruments suited to meet your specific testing needs. Look for Wavetek's distinctive blue and yellow color scheme for maximum reliability and trouble-free test instruments you can count on.

TECH PREFERRED

In field service, equipment maintenance, engineering test bench or depot service bench applications the measuring, testing and troubleshooting of electronics just became a little easier with Wavetek's new T-shaped meters. Our patented, unique "T" brings new meaning to the words "easy-to-read." An oversized display area means larger characters and annunciators allowing the user to

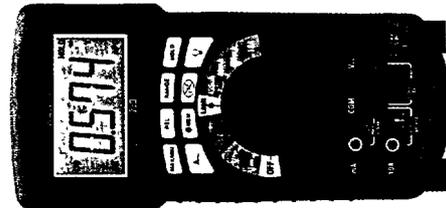

concentrate on making the proper measurements.

For even greater readability in any lighting condition, all three models include Wavetek's exclusive new Digi-Glo™ backlight, the brightest and most evenly lighted DMM display available. Two models, the RMS225A and 235 include a bargraph to provide digital + analog reading.

Each of the three meters in the T-Series offers a unique combination of measuring functions and features suited to your applications. Select from the high-feature, lowest-cost model 220 – or for the highest resolution (10,000 counts!) True-RMS measuring, look to the model RMS225A. For the most features/functions and/or a portable DMM with an RS232C serial computer output, the model 235 is the solution.

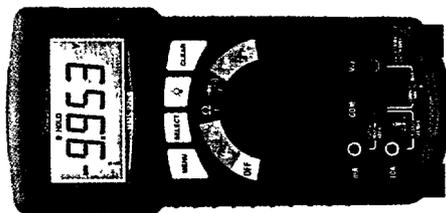

220

- ◆ Industry's Best, Digi-Glo Backlight
- ◆ 8 Functions/27 Ranges
- ◆ 4300-count display
- ◆ Largest 20mm (0.8") High Display Characters
- ◆ Autoranging
- ◆ Max, Min, Rel (Δ), Probe Hold™, Range Lock Modes
- ◆ Auto-Off with Disable Button

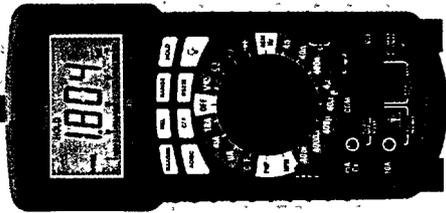

RMS225A

- ◆ Industry's Best, Digi-Glo Backlight
- ◆ 7 Functions/21 Ranges
- ◆ True-RMS Measuring
- ◆ Highest Resolution 10,000-count Digital and 41-Segment Bargraph Displays
- ◆ Autoranging
- ◆ Menu Selectable, Full Autoranging Max, Min, Rel (Δ), Probe Hold, Range Lock Modes

235

- ◆ Industry's Best, Digi-Glo Backlight
- ◆ 11 Functions/45 Ranges
- ◆ RS232C Computer Port; Software and Cable Included
- ◆ Autoranging
- ◆ 4000-count Digital and 42-Segment Bargraph Displays
- ◆ Max, Min, Rel (Δ), Probe Hold, Range Lock Modes

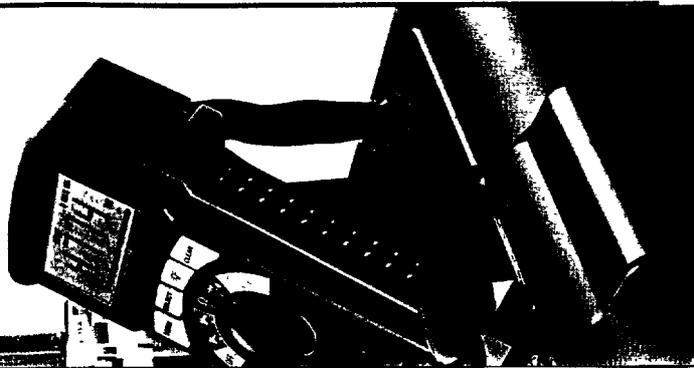

Tech-Preferred™ Features

These autoranging DMMs include powerful, Tech-Preferred features that are easy to use and further distinguish them as the smart choice of professionals everywhere. Simple button selection or the unique menu-driven selection of features such as Probe-Hold, Max/Min reading hold, Relative (Δ) Reading mode and Range Locking. Display and audible annunciators warn the user when measuring potentially hazardous ranges, and fully-fused current inputs add to measuring safety. High quality test leads and the extra protection provided by an anti-skid rubber holster are also included.

All Wavetek T-Series meters also provide additional time-saving advantages that give you increased utility, greater performance and measuring convenience in every application.

- ◆ Oversized Display Characters
- ◆ Long Battery Life with 30-minute Auto-off
- ◆ Tilt-Stand and Flex-Strap™
- ◆ Meet EN61010-1 Standards and are CE Marked
- ◆ Spare Fuses Included

184-469

Models CR50 & LCR55

Component Testers

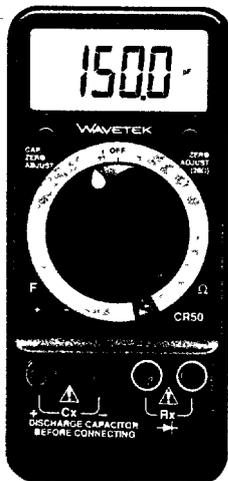

CR50 Capacitance and Resistance Meter

- ◆ Unique Full-Range Capacitance Meter and Resistance Meter (C+R)
- ◆ Dual "Zero Adjust" Pots
- ◆ "Low Ohms" Range
- ◆ Premium Test Leads with Alligator Clips

Model CR50 is a versatile, complete capacitance meter and resistance meter in one. Users considering purchasing just a "C-Meter" will get greater value with the CR50 because it includes a full range "R-meter" at no extra cost!

The CR50 measures capacitance in nine ranges from 200pF to 20mF with a resolution to 0.1pF in the 200pF range. To assure optimum accuracy an external "Zero" pot adjusts out stray capacitance from test leads in the 200pF range. For resistance measuring there are seven ranges from 20Ω to 20MΩ, with 0.01Ω resolution in the 20Ω range. The "low ohms" 20Ω range also features its own "zero" pot and is a measuring function typically found only in expensive, bench-grade meters. The meter also includes a diode test function and Tech-Preferred™ continuity beeper feature never found on just a C-meter.

Large, 17mm (0.7 inch) high display characters and annunciators within the display to echo the selected range provide

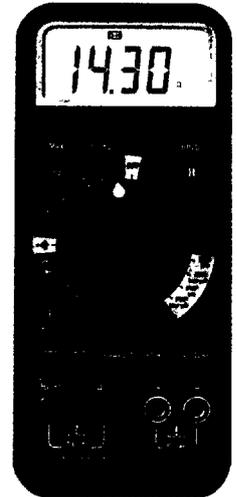

optimum readability and user accuracy. Test leads include screw-on alligator clips for easy attachment to components and lead wires. Optional accessories include H10 holster and VC30 case.

LCR55: LCR + Meter

- ◆ Inductance, Capacitance, and Resistance Meter
- ◆ Transistor Continuity, Diode/Microwave Diode Test
- ◆ 3½ Digit Display
- ◆ Large, 18mm (0.7") High Digits
- ◆ Data Hold & Max Hold
- ◆ Auto-off

Model LCR55 is an inductance, capacitance, and resistance meter with 28 user ranges that measures a wide range of values. In the 20Ω range, a zero adjustment knob allows to compensate for the test lead resistance. The LCR55 also tests diodes, including microwave diodes, and has slots for capacitor plug-in as well as a dedicated test socket for transistor testing. Optional accessories include H30 holster and VC231 soft case.
