

SILENT TWIN RELAY FOR AUTOMOTIVE APPLICATIONS 1POLE X 2, H-BRIDGE, 25A

FTR-P2 SERIES

■ FEATURES

• Low operating sound

An original silent mechanism decreases the propagation of operating sound when mounted on a PCB. (Average sound pressure: 50dB at 5 cm).

- Compact, high density package 350 mm² mounting area. (11% less than the FBR 510 series non-quiet twin relay).
- High sensitivity, low power consumption (nominal power consumption: 450 mW).
- High capacity

Heat dissipation is high due to a single cover structure.

• Ease of PCB layout

The FTR-P2 incorporates internal H-Bridge connections typically used in reversing applications. All terminals are on the perimeter.

- High breaking capability.
 In addition to the standard gap product (0.3 mm), a higher gap
 - product (0.6 mm), suitable for over voltage breaking can be supplied.
- Typical applications
 Power window, Doorlock, Power seat, Wiper (for H-Bridge circuit)
