

Jackets

Active Safety Jackets from Marl Optosource combine reflective warning with active flashing warning, offering maximum visibility in the very worst weather conditions, such as fog and rain giving a far superior performance to standard reflective safety wear currently available.

All specifications are subject to change without notice.

- Available in adult and child sizes - various colours
- Retro-reflective
- Active LED illumination by operator switch for use in adverse weather conditions or poor light - fog, mist, rain, dusk and dawn
- Visible up to 500 metres
- Sealed, lightweight construction, incorporating power supply and operator switch
- Two AA standard batteries last for 60 hours' continuous operation
- Flash rate in accordance with BS 3143:Part2
- Solid-state reliability

A revolutionary range of active safety wear and equipment - offering maximum visibility in even the harshest weather conditions - is now available from Marl Optosource. Marl has invested 20 years' experience in LED technology to develop this innovative range of products which represents a major step forward in safety.
