Standard Plug with Large Solder Bucket Termination

This range features large solder bucket connection that will accept conductors up to 5.5mm in diameter. The product is also supplied with a large diameter insulating cover that accepts cable up to 7.1mm in diameter. Incorporated in the product is a stainless steel contact spring. Rated at 10 A.

The range is now available with 0.5 micron gold plating for reduced contact resistance. When used in audio applications this can improve signal losses between mated pairs.

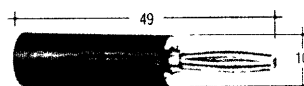

Plugs with order codes 583 and 584 feature solder, screw or crimp termination.
