

GI79XXA

3-TERMINAL NEGATIVE VOLTAGE REGULATORS

Description

The GI79XXA series of fixed-voltage monolithic integrated-circuit voltage regulators are designed to complement Series GI78XXA in a wide range of applications. These applications include on-card regulation for elimination of noise and distribution problems associated with single-point regulation. Each of these regulators can deliver up to 1.5 amperes of output current. The internal current limiting and thermal shutdown features of these regulators make them essentially immune to overload. In addition to use as fixed-voltage regulators, these devices can be used with external components to obtain adjustable output voltage and current and also as the power pass element in precision regulators.

Features

- -5V, -6V, -8V, -12V, -15V, -18V, -24V output voltage available
- Internal Thermal Overload Protection
- High Power Dissipation Capability
- Internal Short-Circuit Current Limiting
- No External Components
- Output Transistor Safe-Area Compensation

Package Dimensions

Absolute Maximum Ratings

Parameter	Ratings	Unit
Input voltage	GI7905A ~ 18A	-35V
	GI7924A	-40V
Output current	1.5	A
Operating junction temperature range	0 ~ 150	°C
Storage temperature range	-55 ~ 150	°C
Thermal resistance junction-air (RθJA)	125	°C/W
Thermal resistance junction-cases (RθJC)	12.5	°C/W

Electrical Characteristics

GI7905A (Refer to the test circuits, Tj=0~125°C, Io=500mA, Vin=-10V, Cin=2μF, Co=1μF unless otherwise specified)
