

ECLIPSE® • OEM PRESSURE TRANSDUCER

APPLICATIONS

- HYDRAULIC / PNEUMATIC CONTROLS
- AIR COMPRESSORS
- ENERGY MANAGEMENT: "SMART" COMPRESSORS, REFRIGERATION/CHILLER CONTROL
- PROCESS CONTROL SYSTEMS
- ENGINE CONTROLS AND MONITORS

The Eclipse® is designed for high volume OEM's needing a low cost pressure transmitter for industrial or other heavy duty applications. The Eclipse's combination of rugged packaging, internal signal amplification and price make it ideal for many applications.

The pressure media is contained by a brazed assembly of stainless steel. There are no hidden O-rings or elastomers containing the media. A plated steel case protects the internal electronics.

It is available with either a 0.5 to 4.5 volt or 4 to 20 mA output. The 4 to 20 mA output is useful for applications where electrical noise may be a concern. Many units are CE compliant.
