INSTALLATION FITTINGS FOR TEMPERATURE PROBES

FLANGE PLATES

Labfacility flange plates enable the mounting of temperature probes with compression fittings. Available in stainless steel and brass, flange plates are particularly recommended for mounting probes in process ovens, kilns, heating and ventilating ducts, etc

Diameter 50mm
Female thread 1/8" BSPP
Mounting holes 3 x 4mm dia. on 40mm PCD

STAINLESS STEEL	CA-250
BRASS	CA-251

BAYONET FITTINGS AND ADAPTORS

Labfacility offers a range of bayonet fittings and associated adaptors for securing temperature sensors. When fitted, a bayonet fitting spring loads the sensor to keep it in permanent contact with the measured surface. Bayonet fittings are particularly suitable for mounting sensors in plastics extruders, injection moulding machines, etc.

Two types of bayonet fixing are available (compression or grub screw). Select the fitting to suit sensor diameter. Adaptors are available in two thread sizes and various lengths.
