PART NUMBER: CZT01 DESCRIPTION: incremental encoder

ELECTRICAL SPECIFICATIONS

	60 ±5 seconds
dielectric strength	50 V ac (50 ~ 60 Hz, cut-off current 2 mA) is applied between non-connected terminals and between terminals and the metal frame for
insulation resistance	50M Ω min.
contact resistance	500m $Ω$ max.
output resolution (ppr)	12
supply current	1 mA
supply voltage	10 V dc
current consumption	100mA or less (under no load)

MECHANICAL SPECIFICATIONS

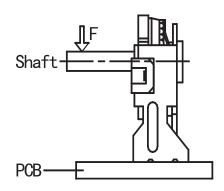

detent points	12 detent points each (detent angle: 30° ±3°)
shaft play in axial direction	0.3 mm max.
rotational torque	14 ~ 40 gf*cm
rotational life	100000 cycles (at 3~30 cycles per minute with 0.5 mA, 5 V dc load)
mounting height	7 ± 0.1mm
mechanical strength	free from mechanical abnormalities after test (testing detailed in figure 1)

ENVIRONMENTAL SPECIFICATIONS

operating temp	-25° to +85° C
humidity	≤85% RH
vibration proof	10 ~ 55 Hz / 1.5mm 2h each X, Y, Z

FIGURE 1

Mount the product to the P.C.B. and apply a static force of 10 gf $^{\bullet}$ cm minimum. Contact resistance: 5Ω max., Insulation resistance: $10 \text{ M}\Omega$ min.

PART NUMBER: CZT01 DESCRIPTION: incremental encoder

WEATHER PROOF CHARACTERISTICS

item		evaluation standard		
hot proof	After testing at -25° ± 2°C for 96 hours, the encoder will be allowed to stand under normal temperature and humidity conditions for 1 hour. Measurements will be made within 1 hour after that. Condensation will be eliminated. After testing at 85° ± 2°C for 96 hours, the			
	encoder will be allowed to stand under normal temperature and humidity conditions for 1 hour. Measurements will be made within 1 hour after that.			
moisture resistance	After testing at 40° ± 2°C, 90 ~ 95% RH for 96 hours, the encoder will be allowed to stand under normal temperature and humidity conditions for 1 hour. Measurements will be made within 1 hour after that. Condensation will be eliminated.	After test: Contact resistance: 5Ω max.		
temperature cycling	After 5 cycles of the following conditions, the encoder will be allowed to stand under normal temperature and humidity conditions for 1 hour. Measurements will be made within 1 hour after that. Condensation will be eliminated.	Insulation resistance: 10 M Ω min. The performance requirements specified in Electrical Specifications will be satisfied.		
	30 min 85℃±2℃ Room Temp. 10-15min 10-15min 1 cycle			
salt mist	The encoder will be checked after the following test: 1) Temperature: 35 ± 2°C 2) Salt solution: 5 ± 1% (solids by mass) Immersion time: 5 minutes 3) After immersing, salt deposit will be removed by running water. 4) Duration: 2 hours	No corrosion will be recognized in the metal sections of the encoder.

PART NUMBER: CZT01 DESCRIPTION: incremental encoder

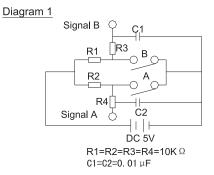

OUTPUT WAVEFORM

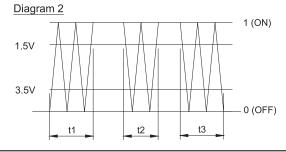

Shaft rotational direction	Signal	Output
C.W.	A (Terminal A∼C)	OFF
	B (Terminal B∼C)	OFF ON
C.C.W.	A (Terminal A∼C)	OFF ON
3.5	B (Terminal B∼C)	OFF ON

SLIDING NOISE

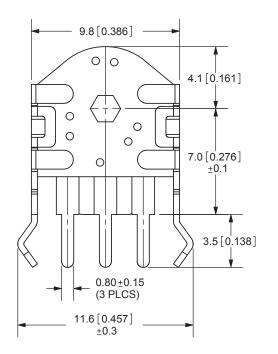

Between 3.5V and 1.5V
Measurement circuit
Diagram 1
Measure condition:360°/s
for rotational speed
t1. t3: 3ms Max.
t2: 2ms Max.

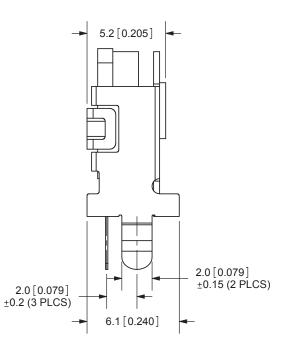

T1.T2.T3: 5ms Min.
