The 12AW series of DC/DC converters operate from a nominal 24 or 48 VDC input source. This series is available in 5 volt & 3.3 volt single output and a dual + & - 12 volt output models. Maximum output power is 12 watts. These board mountable, low profile DC/DC converters are ideal for the requirements of the industrial control and telecommunications industries.

The size and pin out conform to internationally recognised packaging that is an industry standard. Operating from a nominal 24 or 48 VDC input source, this PCB mountable, low profile miniature converter provides single regulated, isolated outputs of 5 & 3.3 VDC or a dual regulated, isolated output of ± 12 VDC. It is designed to meet a variety of safety and emissions requirements including CE (LVD), EN 55022 "Class A", and UL60950.
