Multi-Output HP6 Front End and RACK-HP600 Data Sheet

HP6 Multi-Output AC-DC Front End

RACK-HP600

HP6 and RACK-HP600 Features

- Compact 1U design
- N+1 redundancy with hot plug capability
- Up to four individually regulated outputs
- I^2C interface with interrupt capability
- Hot swap with low insertion/extraction force connector
- Power factor corrected
- No minimum load required
- 5 V @ 1 A standby output
- Single-wire current sharing
- Self-contained ORing Diodes
- Current limit and over-voltage protection
- Full power up to 50º C
- TUV, cTUVus & CB report
- 600 watts per module
- Ac input with PFC

Description

The HP6 provides up to 600 Watts total output power with one to four outputs ranging from 0.8 to 12 Volts. HP600 RACKS offer hot-plug capability for up to 1200 Watts total at low line (2 +1) or 1800 Watts total at high line. Three separate multi output power supplies are internally paralleled and will automatically current share for load distribution. Hot-swap modules can be replaced with no system downtime.

Output Voltage X = A (2.0V); B (3.3V); C (5V); T (2.5V); V (1.8V); W (1.5V); X (1.2V); Y (1V); Z (0.8V)
Options O = B (I^2C); M (Output power good – TTL high); N (Power fail – TTL high); R (Reverse airflow)
Please contact Power-One for additional model combinations.

power-one® Changing the Shape of Power

Input Specifications

Input voltage range: 85 to 264 Vac, 47 to 63 Hz
Power Factor: 0.99 at full load and nominal line
Inrush Current: 40 A peak hot and cold start
Input Protection: Internal 15 A line fuse

Output Specifications

Output Power: 600 W maximum
Overshoot/Undershoot: Less than 1% at turn-on or turn-off. Less than 3% for 50% to 100% load step.
Start-Up Time: Less than 2 seconds
Efficiency: 78% typical measured at full load, nominal input
Hold-up Time: 20 ms minimum at full load and low line
Single Wire Current Share (V1, V2 and +12V): 10% full load rating.
Load Regulation: 0.5% with remote sense, 2% without
Line Regulation: 0.1% over entire operating range
Cross Regulation: Less than 0.5%
Minimum Load: No minimum load required
Overcurrent Protection: All outputs set to 115-135% of full rated load with automatic recovery
Overtemperature Protection: Automatic shutdown with auto recovery.
Remote Sense: Compensates for voltage drop of up to 0.5 V to the load (V1, V2, and +12V). Shorted sense lead protection.
Overvoltage Protection: All outputs set at 115%-135% of nominal. Reset by cycling input power.
Output Noise and Ripple: PARD: 1% or 50 mV p-p, whichever is greater, measured at 20 Mhz bandwidth.

Mechanical Specifications

Size: 1.6" H x 5" W x 11.5" D
Input Connector: Front panel IEC
Output Connector: FCI power blade
MTBF: 250,000 hours calculated at 25 °C, Bellcore Standard
Warranty: Two years from date of shipment, standard product only.

Specifications are subject to change without prior notice.

Signals and Controls

LED Output Good Indicator: Front panel green LED indicates power supply is good; amber indicates fault.
LED AC Good Indicator: Front panel green LED indicates Ac input voltage is present and above minimum level.
Output Good Signal*: TTL compatible signal, normally high. Goes low when power supply is out of specified range.
Power Fail Signal*: TTL compatible signal, normally high (indicating Vin is present and above minimum level).
Enable*: Normally TTL High, drive low to enable.
*All interface signals are TTL compatible

I^2C Interface

Event Driven Messages:
- Notification of fan speed abnormality
- Output voltage under specified 'good' range
- Output voltage over specified 'good' range (software OVP)
- Temperature abnormalities

Sensor Device Commands:
- Get voltage readings
- Get temperature readings
- Get fan speed readings

FRU (Field Replaceable Unit) Information Storage:
- Manufacturer's name
- Product name
- Product part/model number
- Product version/revision
- Product serial number

Safety & Environmental

Operating Temperature: 0 to 50°C
Storage Temperature: -40°C to +85°C
Operating Humidity: Maximum 95% RH non-condensing
Operating Altitude: 10,000 feet
Non-operating Altitude: 40,000 feet
Temperature Coefficient: 0.02% per °C within rated load
Safety Agency Compliance: TUV, cTUVus & CB report
EMI: Meets EN55022, Class B
Harmonic Suppression: Meets EN6100-3-2
Input Transient Protection:
Electrostatic Discharge: EN61000-4-2, Criteria B
Radiated, Radio-Frequency, Electromagnetic Field: EN61000-4-3, Criteria A
Electrical Fast Transients/Burst: EN61000-4-4, Criteria B
Voltage Fluctuations and Flickers: EN61000-3-3, Criteria B
Surge Test: EN61000-4-5, Criteria B
Conducted Immunity: EN61000-4-6, Criteria A
Dielectric Withstand:
Input-to-ground: 2200 Vdc
Input-to-output: 4300 Vdc
Output-to-case: 25 Vdc
Ac Leakage Current: 1.2mA maximum at 240 Vac, 50 Hz
