

Input/output relays for interface between the CPU and the load

I/O-RELAYS

Compliance with RoHS Directive

FEATURES

- Input and output modules for interfacing between CPU and external input devices or loads
 - IAC: AC input (yellow)
 - OAC: AC output (black)
 - IDC: DC input (white)
 - ODC: DC output (red)
- Excellent transient noise immunity
- Breakdown voltage: 4,000 V between input and output
- Zero-cross switching for reducing EMI
- LED operation indication types available

TYPICAL APPLICATIONS

1. Optimum for minicomputer and microcomputer use, and for feed back control process control systems.
Robot, NC machine, Automatic Assembling machine.
2. Programmable controllers controls for motors, solenoids and solenoid valves.

ORDERING INFORMATION

Input or Output

I: Input module

O: Output module

AC or DC

AC: AC input or AC output

DC: DC input or DC output

Logic supply or control voltage

3/15: 3 to 15 V DC

4/15: 4 to 15 V DC

10/32: 10 to 32 V DC

Input or Output Voltage

Input

Nil: 80 to 140 V AC

3 to 32 C DC

A: 160 to 280 V AC

Output

Nil: 75 to 125 V AC

3 to 60 V DC

A: 75 to 250 V AC

10 to 200 V DC

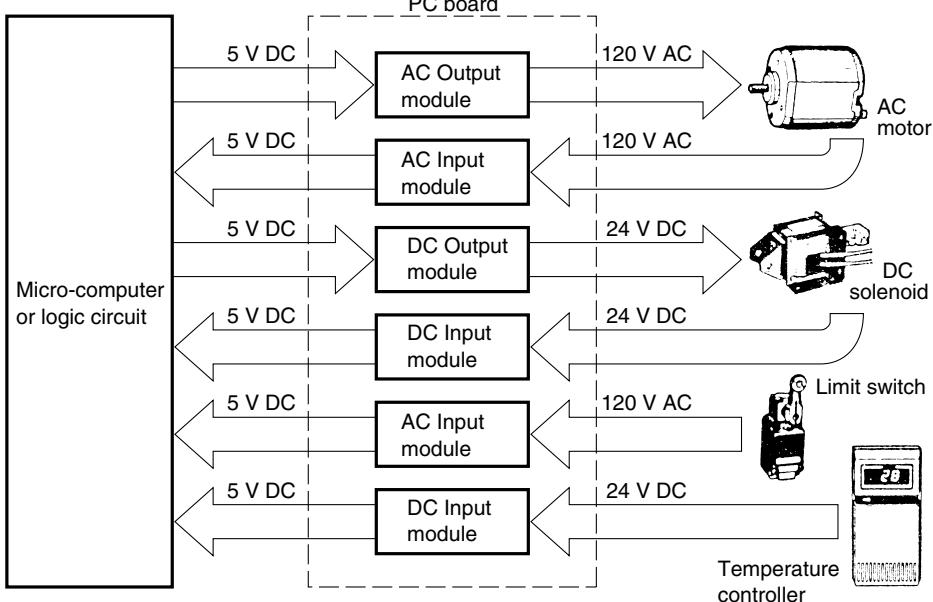

Operation indication

Nil: No operation indication

L: Operation indication

I/O

EXAMPLE OF I/O SYSTEM CONSTRUCTION

Recently, the microcomputer shown in the left has come into use, with a rapid increase in the use of feedback control for process controllers. As an input/output interface relay, it represents a fast responding interface with long life, noiseless, PC board mounting facility, making circuit design and manufacture simple, and providing amplification of maintenance with space saving. Our company's I/O relays have been grouped for use with either AC or DC devices as AC output type, AC input type, DC output type, and DC input. In addition, the I/O use relay is modularized identically, responding to the various load types for PC board mounting. Because combinations can be freely used, circuit design has been greatly facilitated. Accordingly, the above diagram of interface PC board mounting is a practical construction which can be used.
