

Programming (ZIP DIP)

3M™ ZIP DIP Sockets

ZIP (zero insertion force) DIPs are designed for applications where field replacement or programming of DIPs is required. The patented ZIP lever actuated mechanism allows easy insertion and withdrawal without lead damage. Leads are on .100" centers.

3M™ Double ZIP DIP Sockets

For DIPs with .100 inch lead spacing, the extra wide contact zone allows insertion of DIPs with .300 through .600 inch between rows. Lever actuated zero insertion force mechanism. Sockets easily disassemble for repair. Contact point .090 inch below top surface of socket.

2-0132-07244-030-018-000	ADAPTER-END USE CQFP
2-0132-07244-103-018-000	LID-END USE CQFP/PQFP

Receptacles**3M™ ZIP DIP II Receptacles**

These receptacles are designed so that a worn out or damaged socket can be simply unplugged and replaced with a new one without the expense and downtime of replacing the entire board. Available in wire-wrap (WW) and solder-tail (ST) options, with mounting flanges that hold receptacle to board, pre-tapped holes mate with screw-holes in socket for firm hold (two screws provided with each receptacle).
