

Connectors Conforming to European Safety Standards

As of January 1995 all industrial machinery, including machine tools, which are exported to Europe must conform with European safety standards. The CE05 series connectors, which offer full compatibility with DMS connectors in Factory Automation applications, were developed to comply with this demand.

■ FEATURES

- **Conformity with European Safety Standards**

CE05 series connectors fully conform with the following European safety standards:

EN60204-1 (electric machinery parts) and DIN VDE 0627 (connectors). They have been approved by TÜV Rheinland.

- **Sequence Structure with Protective Circuitry** (First-make, Last-break contact design)

Connectors are provided with a pre-mating and grounding contact, consisting of a shell having conductivity with the shell to serve as protective circuitry. When making connections, the contact of the CE05 connector is connected first before other contacts, and detached last.

- **Conformity with MIL-C-5015**

CE05 connectors fully comply with MIL-C-5015 standards and can be mated with conventional DMS connectors.

- **Water/Oil/Dustproof Structure: Class IP67 Protection**

Once connected, full protection is provided against ingress of water droplets, cutting fluid, dust particles, etc. Use of a synthetic rubber insert ensures protection against water and dust even in the unconnected state.

- **Plug Connector Accessories**

Available accessories include waterproof straight-back shells, waterproof angle-back shells and waterproof cable clamps (with rubber bushing). Plug connectors are also available for conduit applications.

- **Solder Wire**

Like DMS connectors, CE05 connectors have solder buckets.

Note: CE05 connectors offer full compatibility with DMS series connectors.

Waterproof Cable Clamps: CE3057-XXA-X(D265)

Unit : mm(inch)

Material/Finish...Aluminium alloy/Zinc Plating.

Black chromate finish

CE3057-XXA-X (D265) is a waterproof cable clamp for use with a plug. The cable clamp body is the DMS3057-XXA that has a waterproof rubber bushing. Therefore, be sure to use a jacketed cable meeting one of the applicable cable size ranges as shown. The cable clamp should be used together with a waterproof back shell.

NOTE : Please place an order for a washer separately from a bushing.

Cap and Chain Assembly (Not waterproof)

Unit : mm(inch)

Material/Finish

CapAluminum alloy/Black chromate finish

Chain ...Stainless steel

The cap and chain assembly protects the connector joint by preventing the intrusion of dust or other foreign substances that may impair the electrical connection. The cap for the receptacle (DMS 25043) comes with a drip-resistant gasket.
