

3-MODE 150mA LDO REGULATOR with the Reverse Current Protection

NO.EA-118-100317

OUTLINE

The R1163x Series consist of CMOS-based voltage regulator ICs with high output voltage accuracy and low supply current. These ICs perform with the chip enable function and realize a standby mode with ultra low supply current. To prevent the destruction by over current, the current limit circuit is included. The R1163x Series have 3-mode. One is standby mode with CE or standby control pin. Other two modes are realized with ECO pin. Fast Transient Mode (FT mode) and Low Power Mode (LP mode) are alternative with ECO pin. Consumption current is reduced at Low Power Mode compared with Fast Transient Mode. The output voltage is maintained between FT mode and LP mode.

Further, the reverse current protection circuit is built-in. Therefore, if a higher voltage than V_{DD} pin is forced to the output pin, the reverse current to V_{DD} pin is very small (Max. 0.1 μ A), so it is suitable for backup circuit.

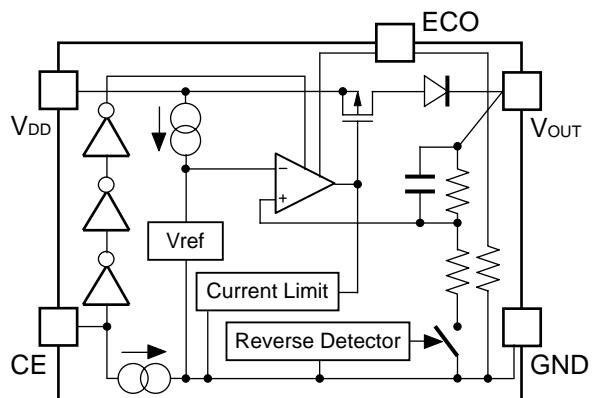

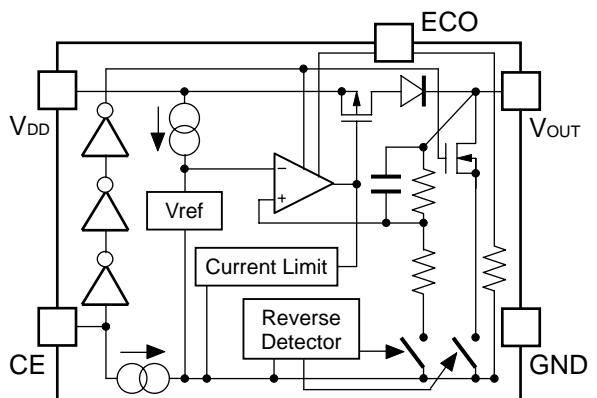

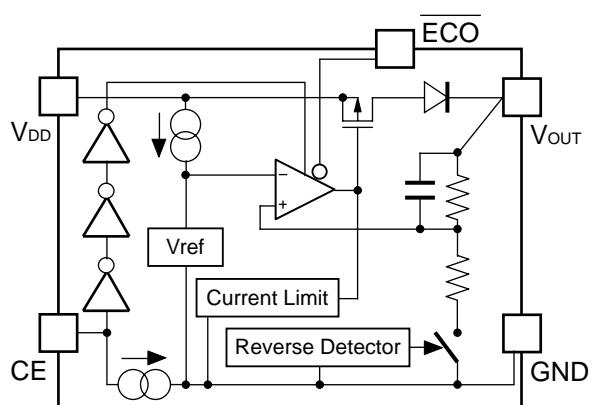

Since the packages for these ICs are SOT-23-5, SON-6, and DFN(PLP)1616-6 packages, high density mounting of the ICs on boards is possible.

FEATURES

- Supply Current Typ. 6.0 μ A (Low Power Mode),
Typ. 70 μ A (Fast Transient Mode)
- Standby Mode Typ. 0.6 μ A
- Reverse Current..... Max. 0.1 μ A
- Input Voltage Range 2.0V to 6.0V
- Output Voltage Range..... 1.5V to 5.0V (0.1V steps)
(For other voltages, please refer to MARK INFORMATIONS.)
- Output Voltage Accuracy..... $\pm 1.5\%$ ($\pm 2.5\%$ at Low Power Mode)
- Temperature-Drift Coefficient of Output Voltage .. Typ. $\pm 100\text{ppm}/^{\circ}\text{C}$
- Dropout Voltage Typ. 0.25V ($I_{OUT}=150\text{mA}$, $V_{OUT}=2.8\text{V}$)
- Ripple Rejection..... Typ. 70dB ($f=1\text{kHz}$, Fast Transient Mode)
- Line Regulation Typ. 0.02%/V (Fast Transient Mode)
- Packages DFN(PLP)1616-6, SOT-23-5, SON-6
- Built-in fold-back protection circuit Typ. 40mA (Current at short mode)
- Performs with Ceramic Capacitors $C_{IN}=\text{Ceramic } 1.0\mu\text{F}$, $C_{OUT}=\text{Ceramic } 0.47\mu\text{F}$

APPLICATIONS

- Precision Voltage References.
- Power source for electrical appliances such as cameras, VCRs and hand-held communication equipment.
- Power source for battery-powered equipment.

BLOCK DIAGRAM**R1163xxx1B****R1163xxx1D****R1163xxx1E**

SELECTION GUIDE

The output voltage, auto discharge function, and package, etc. for the ICs can be selected at the user's request.

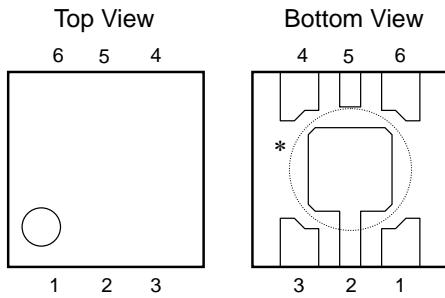

Product Name	Package	Quantity per Reel	Pb Free	Halogen Free
R1163Kxx1*-TR	DFN(PLP)1616-6	5,000 pcs	Yes	Yes
R1163Nxx1*-TR-FE	SOT-23-5	3,000 pcs	Yes	Yes
R1163Dxx1*-TR-FE	SON-6	3,000 pcs	Yes	Yes

xx: The output voltage can be designated in the range from 1.5V(15) to 5.0V(50) in 0.1V steps.
(For other voltages, please refer to MARK INFORMATIONS.)

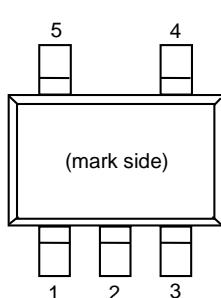

* : The auto discharge function at off state are options as follows.
(B) without auto discharge function at off state
(D) with auto discharge function at off state
(E) without auto discharge function at off state, ECO logic reverse type (Low Power mode at ECO="H")

PIN CONFIGURATIONS

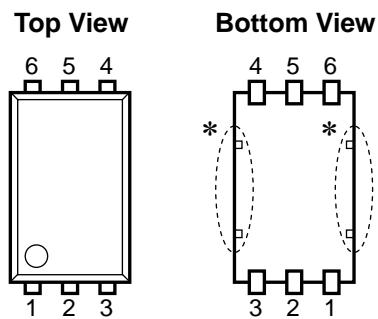

• DFN(PLP)1616-6

• SOT-23-5

• SON-6

PIN DESCRIPTIONS

• DFN(PLP)1616-6

Pin No	Symbol	Pin Description
1	V _{OUT}	Output pin
2	GND	Ground Pin
3	ECO/ECO	MODE alternative pin
4	CE	Chip Enable pin ("H" Active)
5	NC	No Connection
6	V _{DD}	Input Pin

*) Tab is GND level. (They are connected to the reverse side of this IC.)

The tab is better to be connected to the GND, but leaving it open is also acceptable.

• SOT-23-5

Pin No	Symbol	Pin Description
1	V _{DD}	Input Pin
2	GND	Ground Pin
3	CE	Chip Enable Pin ("H" Active)
4	ECO/ECO	MODE alternative pin
5	V _{OUT}	Output pin

• SON-6

Pin No	Symbol	Pin Description
1	V _{DD}	Input Pin
2	NC	No Connection
3	V _{OUT}	Output pin
4	ECO/ECO	MODE alternative pin
5	GND	Ground Pin
6	CE	Chip Enable Pin ("H" Active)

*) Tab suspension leads are GND level. (They are connected to the reverse side of this IC.)

The tab suspension leads should be open and do not connect to other wires or land patterns.

ABSOLUTE MAXIMUM RATINGS

Symbol	Item	Rating	Unit
V_{IN}	Input Voltage	6.5	V
V_{ECO}	Input Voltage (ECO/ECO Pin)	-0.3 ~ 6.5	V
V_{CE}	Input Voltage (CE Pin)	-0.3 ~ 6.5	V
V_{OUT}	Output Voltage	-0.3 ~ 6.5	V
I_{OUT}	Output Current	180	mA
P_D	Power Dissipation (DFN(PLP)1616-6)*	560	mW
	Power Dissipation (SOT-23-5) *	420	
	Power Dissipation (SON-6) *	500	
T_{opt}	Operating Temperature Range	-40 ~ 85	°C
T_{stg}	Storage Temperature Range	-55 ~ 125	°C

*) For Power Dissipation, please refer to PACKAGE INFORMATION.

ABSOLUTE MAXIMUM RATINGS

Electronic and mechanical stress momentarily exceeded absolute maximum ratings may cause the permanent damages and may degrade the life time and safety for both device and system using the device in the field.

The functional operation at or over these absolute maximum ratings is not assured.

RECOMMENDED OPERATING CONDITIONS (ELECTRICAL CHARACTERISTICS)

All of electronic equipment should be designed that the mounted semiconductor devices operate within the recommended operating conditions. The semiconductor devices cannot operate normally over the recommended operating conditions, even if when they are used over such conditions by momentary electronic noise or surge. And the semiconductor devices may receive serious damage when they continue to operate over the recommended operating conditions.

ELECTRICAL CHARACTERISTICS

TYPICAL APPLICATION

(External Components)

Ex. C1: Ceramic Capacitor 1.0μF

C2: Ceramic Capacitor 0.47μF Murata GRM40B474K
Kyocera CM105B474K

TECHNICAL NOTES

When using these ICs, consider the following points:

Phase Compensation

In these ICs, phase compensation is made for securing stable operation even if the load current is varied. For this purpose, be sure to use a 0.47μF or more ceramic capacitor C2.

(Test these ICs with as same external components as ones to be used on the PCB.)

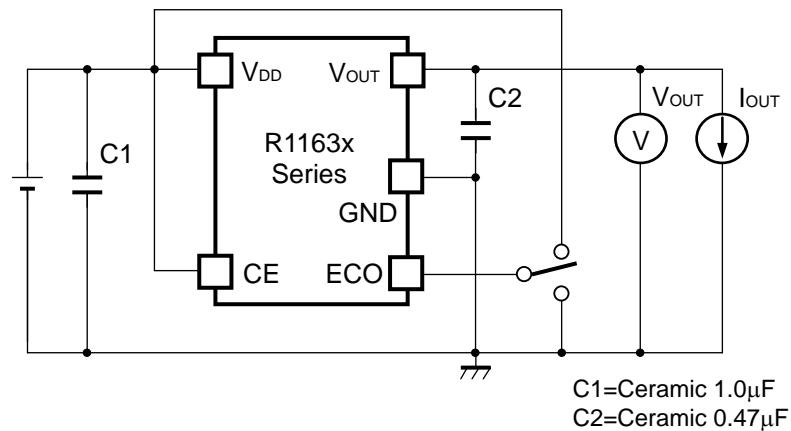

When a tantalum capacitor is used with this IC, if the equivalent series resistor (ESR) of the capacitor is large, output voltage may be unstable.

PCB Layout

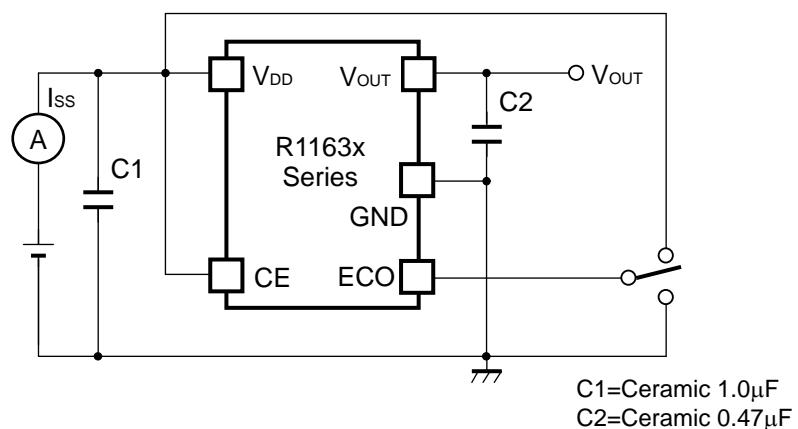

Make V_{DD} and GND lines sufficient. If their impedance is high, noise pickup or unstable operation may result. Connect a capacitor C1 with as much as 1.0μF capacitor between V_{DD} and GND pin as close as possible.

Set external components such as an output capacitor C2, as close as possible to the ICs and make wiring as short as possible.

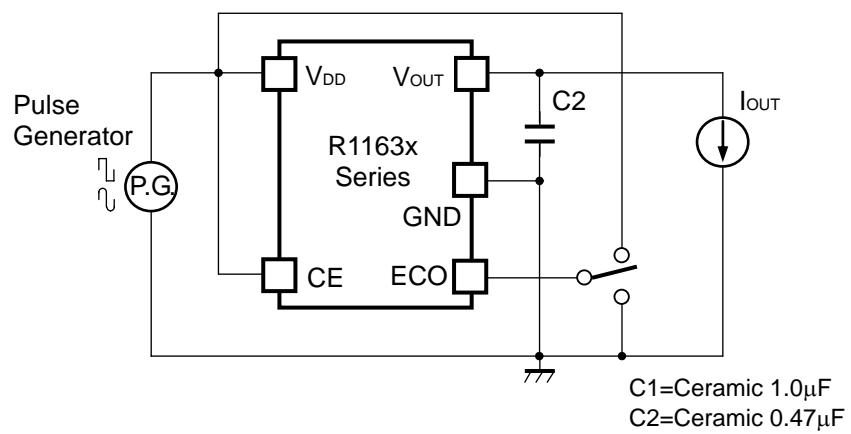

TEST CIRCUITS

Basic Test Circuit

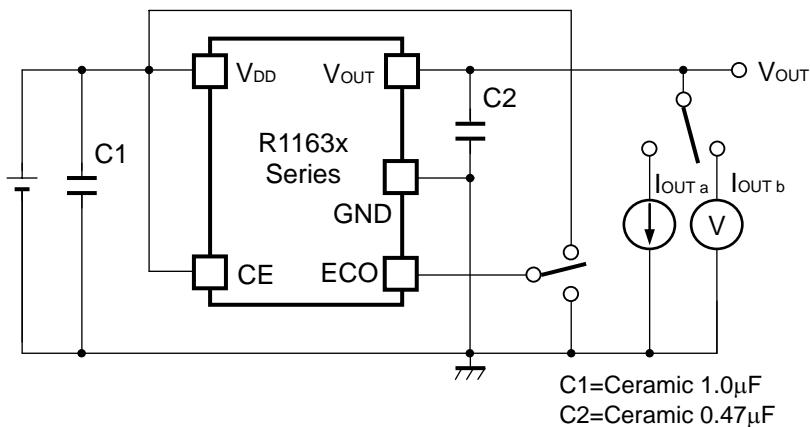

Test Circuit for Supply Current

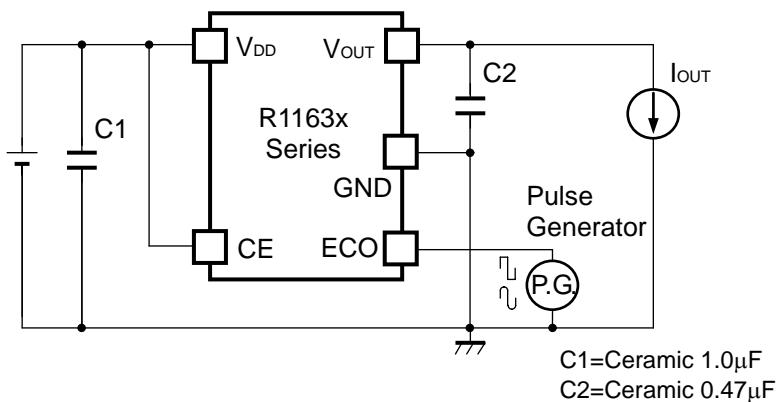

Test Circuit for Ripple Rejection, Line Transient Response

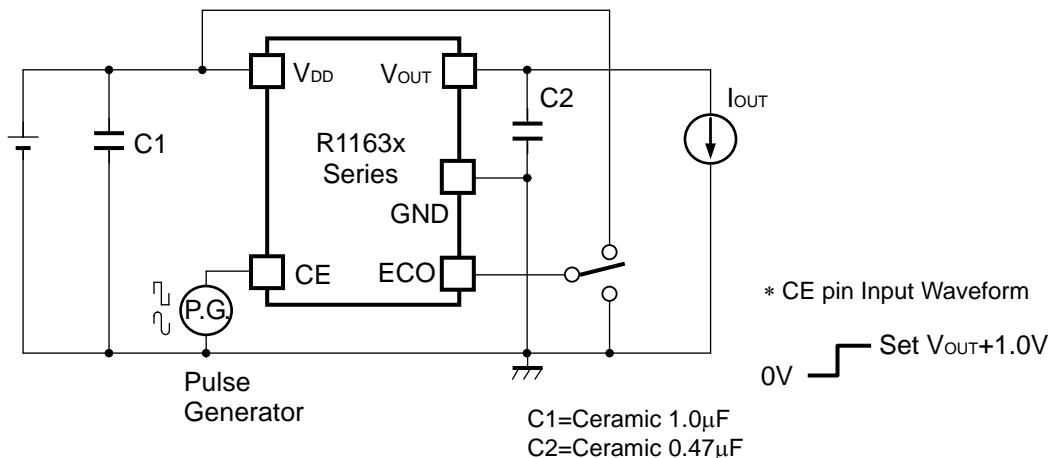

R1163x

Test Circuit for Load Transient Response

Test Circuit for Output Voltage at Mode alternative point

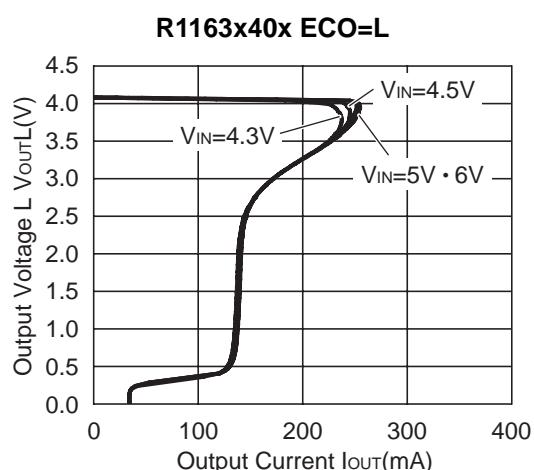

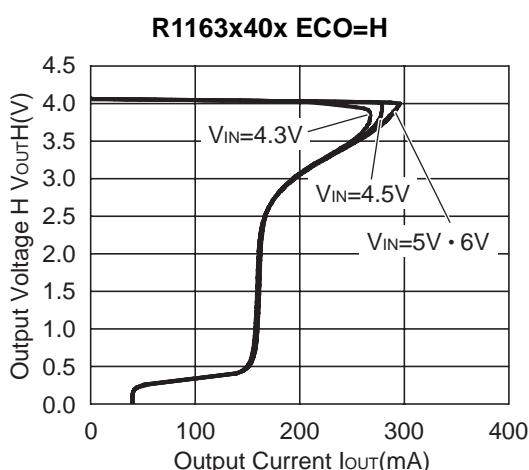

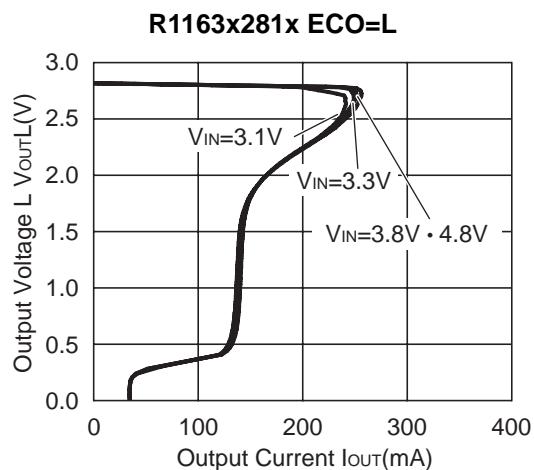

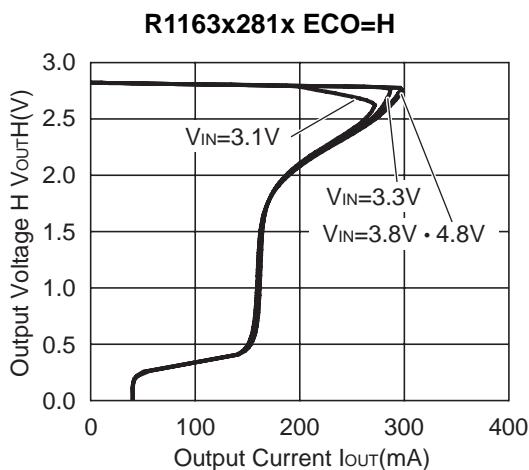

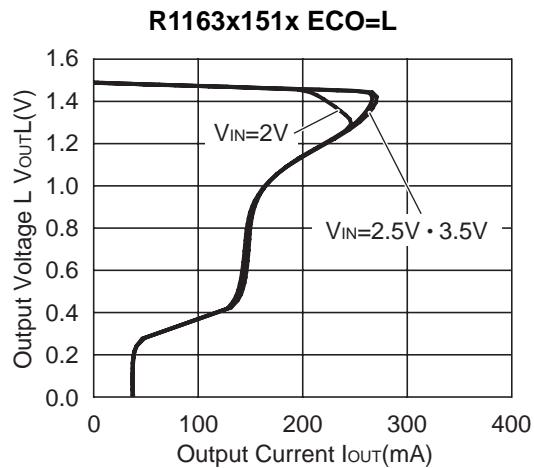

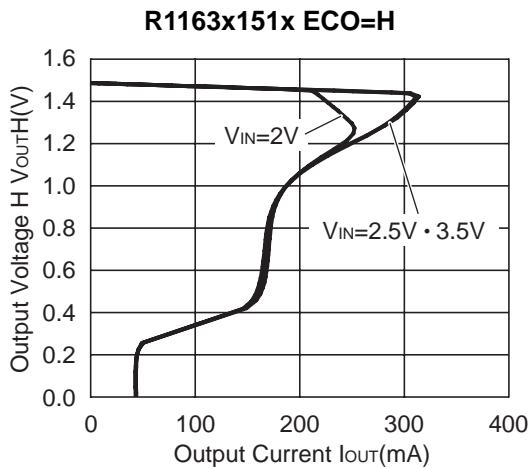

Test Circuit for Turn On Speed with CE pin

TECHNICAL NOTES

When using these ICs, consider the following points:

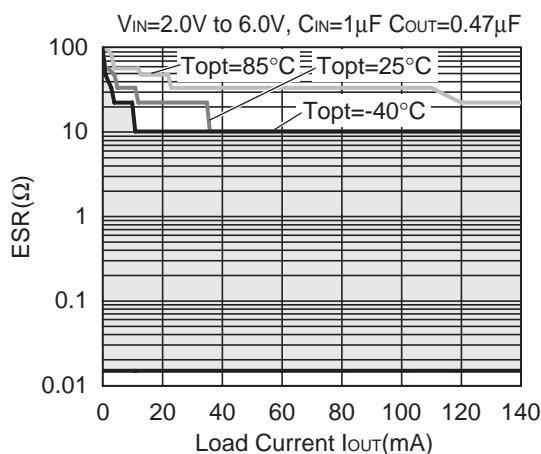

In these ICs, phase compensation is made for securing stable operation even if the load current is varied. For this purpose, be sure to use a capacitor C_{OUT} with good frequency characteristics and ESR (Equivalent Series Resistance) in the range described as follows:

The relations between I_{OUT} (Output Current) and ESR of Output Capacitor are shown below. The conditions when the white noise level is under $40\mu V$ (Avg.) are marked as the hatched area in the graph.

1. The products and the product specifications described in this document are subject to change or discontinuation of production without notice for reasons such as improvement. Therefore, before deciding to use the products, please refer to Ricoh sales representatives for the latest information thereon.
2. The materials in this document may not be copied or otherwise reproduced in whole or in part without prior written consent of Ricoh.
3. Please be sure to take any necessary formalities under relevant laws or regulations before exporting or otherwise taking out of your country the products or the technical information described herein.
4. The technical information described in this document shows typical characteristics of and example application circuits for the products. The release of such information is not to be construed as a warranty of or a grant of license under Ricoh's or any third party's intellectual property rights or any other rights.
5. The products listed in this document are intended and designed for use as general electronic components in standard applications (office equipment, telecommunication equipment, measuring instruments, consumer electronic products, amusement equipment etc.). Those customers intending to use a product in an application requiring extreme quality and reliability, for example, in a highly specific application where the failure or misoperation of the product could result in human injury or death (aircraft, spacevehicle, nuclear reactor control system, traffic control system, automotive and transportation equipment, combustion equipment, safety devices, life support system etc.) should first contact us.
6. We are making our continuous effort to improve the quality and reliability of our products, but semiconductor products are likely to fail with certain probability. In order to prevent any injury to persons or damages to property resulting from such failure, customers should be careful enough to incorporate safety measures in their design, such as redundancy feature, firecontainment feature and fail-safe feature. We do not assume any liability or responsibility for any loss or damage arising from misuse or inappropriate use of the products.
7. Anti-radiation design is not implemented in the products described in this document.
8. Please contact Ricoh sales representatives should you have any questions or comments concerning the products or the technical information.

RICOH COMPANY., LTD. Electronic Devices Company

■Ricoh presented with the Japan Management Quality Award for 1999.
Ricoh continually strives to promote customer satisfaction, and shares the achievements of its management quality improvement program with people and society.

■Ricoh awarded ISO 14001 certification.
The Ricoh Group was awarded ISO 14001 certification, which is an international standard for environmental management systems, at both its domestic and overseas production facilities. Our current aim is to obtain ISO 14001 certification for all of our business offices.
