

# SIEMENS

## SIMOPAC® Modules

### Features

- Fully insulated
- Easy to parallel
- High switching speed capability
- FREDFET-modules
- UL-listed

### Applications

- Motor controls
- UPS
- Switch mode power supplies
- Welding systems
- Induction heating

Drain-Source Voltage $V_{DS}$ [V]	A			B		
	Single Switch			Halfbridge		
	Type	$I_D$ [A]	$R_{DS(on)}$ [mΩ]	Type	$I_D$ [A]	$R_{DS(on)}$ [mΩ]
50	BSM 101 AR	200	3	BSM 204 A	2 × 200	4.5
100	BSM 111 AR	200	8.5	BSM 214 A	2 × 125	13
200	BSM 121 AR	130	20	BSM 224 A	2 × 80	30
400	BSM 141	60	75	BSM 244 F	2 × 45	100
500	BSM 151	48	120	—	—	—
500	BSM 151 F	56	110	BSM 254 F	2 × 35	170
800	BSM 181 / R	36	240	—	—	—
800	BSM 181 F	34	320	BSM 284 F	2 × 20	480
1000	BSM 191 / F	28	370 / 420	BSM 294 F	2 × 18	630

## Attention please!

As far as patents or other rights of third parties are concerned, liability is only assumed for components, not for applications, processes and circuits implemented within components or assemblies. The information describes the type of component and shall not be considered as assured characteristics. Terms of delivery and rights to change design reserved. For questions on technology, delivery and prices: please contact the Semiconductor Group Offices in Germany or the Siemens Companies and Representatives worldwide (see address list). Due to technical requirements components may contain dangerous substances. For information on the types in question please contact your nearest Siemens Office, Semiconductor Group. Siemens AG is an approved CECC manufacturer.

## Packing

Please use the recycling operators known to you. We can also help you – get in touch with your nearest sales office. By agreement we will take packing material back, if it is sorted. You must bear the costs of transport.

For packing material that is returned to us unsorted or which we are not obliged to accept, we shall have to invoice you for any costs incurred.

## Components used in life-support devices or systems must be expressly authorized for such purpose!

Critical components<sup>1</sup> of the Semiconductor Group of Siemens AG, may only be used in life-support devices or systems<sup>2</sup> with the express written approval of the Semiconductor Group of Siemens AG.

1 A critical component is a component used in a life-support device or system whose failure can reasonably be expected to cause the failure of that life-support device or system, or to affect its safety or effectiveness of that device or system.

2 Life support devices or systems are intended (a) to be implanted in the human body, or (b) to support and/or maintain and sustain human life. If they fail, it is reasonable to assume that the health of the user may be endangered.
