

SG1/SG2/SG3 SERIES CONNECTORS

Connectors for SD Card

FEATURES

- Also compatible with MultiMedia Card
- Employs a new push-push eject mechanism
- Space saving design with hold-downs & SMT contacts located inside frame
- Audible click on insertion/removal
- Live insertion - pin nos. 3 and 4 connect with the card first
- Card insertion detection mechanism (pin no. 1 makes contact last)
- Write protect switch lock/unlock detection mechanism for SD card
- Card locking mechanism type available (only on SD card)

.....

SG Series is a socket for SD (secure digital) cards, which was standardized as a small memory or I/O card for small mobile devices by the SDA. (SDA: SD Card Association)

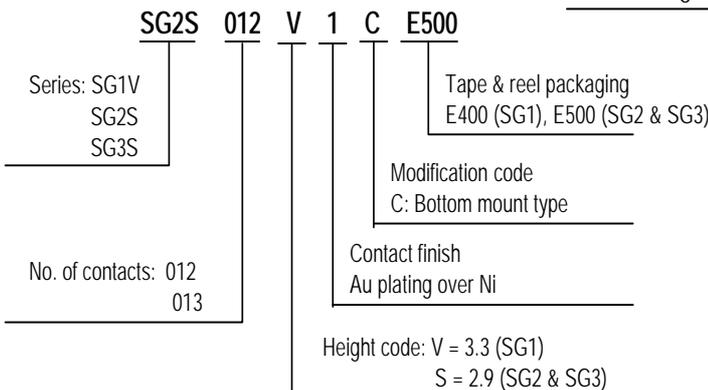

MATERIALS AND FINISHES

Description	Materials/ Finishes
Contact	Copper alloy Contact portion: Au plating over Ni Terminal portion: Sn-Pb plating over Ni
Card detection switch	Copper alloy Contact portion: Au plating over Ni
Write protect switch	Terminal portion: Sn-Pb plating over Ni
Housing	Glass filled LCP
Eject bar	Glass filled Nylon
Cover (including hold-down)	Stainless steel
Cam follower	Stainless steel
Spring	Piano wire/ zinc galvanizing
Spring for locking	Stainless steel

GENERAL SPECIFICATIONS

Number of Contacts	No. of contacts: 13 SG1 12 SG2 & SG3
Current rating	Less than 0.5A
Dielectric withstand voltage	500 VAC r.m.s. (for one minute)
Insulation resistance	1000 megaohms min
Contact resistance	100 milliohms max
Operating temperature	-25° C to +85° C
Rated voltage	3.3V

ORDERING INFORMATION

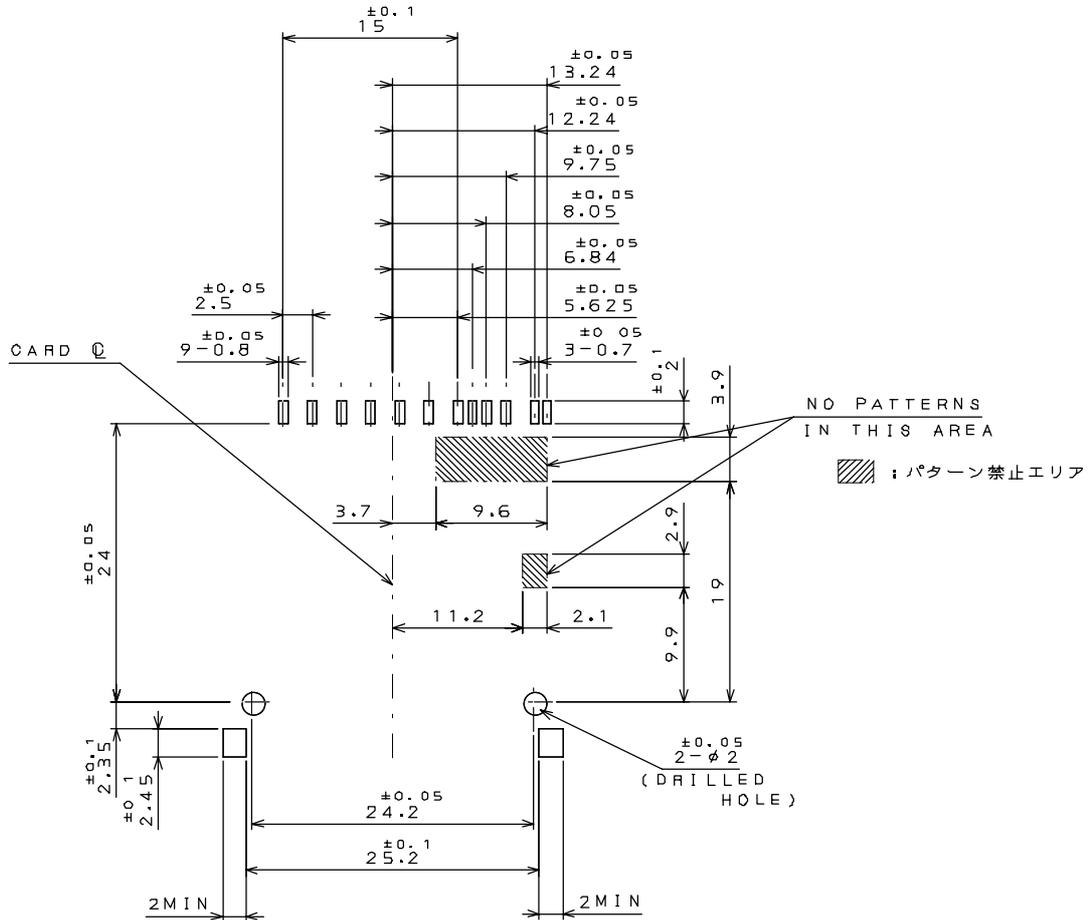

Dimensions in mm (inches).
