

SERIES TMPD MICROMINIATURE DIODES

- Series TMPD consists of standard U.S.A. single or dual diodes.
- Devices are molded in a TO-263AA (high-profile) or TO-236AB (low profile) package. These packages are similar to the SOT23 package and are intended as an alternate to conventional "chip and wire" hybrid assembly techniques.
- P_D (Max.) = 350 mW, T_J = 150°C (Max.)

Part numbers shown above are for the high-profile package. To order the low-profile package, add an "L" to the part number. For example, TMPD914 = high profile; TMPD914L = low profile.

SERIES TND DIODE ARRAYS

FOR PACKAGE DIMENSIONS, SEE PAGE 117.

- The TND series consists of monolithic diode arrays packaged in dual in-line plastic packages for easy automatic insertion and better printed circuit board density.
