

# Single & Multi-Line Surface Mount Chokes

**Steward's** board mounted ferrite products provide economical EMI filtering of differential & common mode noise. Some sizes are also available in through-hole applications in surface mount and through-hole PCB applications. Their rugged construction provides superior protection against transient events as well as much higher peak current handling capability than other EMI suppression devices.

## Features:

- Up to 10A current rating
- Most economical components for filtering either single line or groups of signals
- Can be used as multi-turn device
- Parts available in broad band, low frequency and high frequency materials

F0318 or F0330 for 3 lines

F0530 for 5 lines

F0818 for 8 lines

\* Single lines available 25, 28, & 35 (low frequency) materials.  
Multi-lines available in 25 & 29 materials.
