## Description

AP10N70 series are specially designed as main switching devices for universal 90~265VAC off-line AC/DC converter applications. Both TO-220 and TO-262 type provide high blocking voltage to overcome voltage surge and sag in the toughest power system with the best combination of fast switching, ruggedized design and cost-effectiveness.

The TO-220 and TO-262 package is widely preferred for commercial-industrial applications. The device is suited for switch mode power supplies, DC-AC converters and high current high speed switching circuits.
