The TPP 100 Series of 100 Watt AC/DC power supplies feature a reinforced double I/O isolation system according to latest medical safety standards (60601-3 3rd edition, $2 \times MOPP$).

The excellent efficiency of up to 92% allows a high power density for the standard $2.0'' \times 3.0''$ packaging format. The full load operating temperature range is -25° C to $+50^{\circ}$ C while it goes up to 70°C with 50% load derating.

They come with an active power factor correction and the EMC characteristic is dedicated for applications in industrial and domestic fields.

High reliability is provided by use of industrial quality grade components and an excellent thermal management. It makes the products an ideal solution for medical devices and for demanding safety and space critical applications.
