## SR16C-J6

**SR16 Series Cost Effective Digital Vane Sensor; Hall-effect technology; twin tower configuration; sinking output; 3.8 to 30 Vdc supply voltage**

### Features

- Compact, robust packages
- Mechanically interchangeable with our standard optical style sensors
- Operated by a "Ferrous Vane" interrupter for pulse counting or position sensing
- Current sinking (Open Collector) output
- 3.8 Vdc to 30 Vdc power supply
- Medium level magnetic switching to reduce stray field interference
- Internally sealed packages for moderate environment applications
- No mechanical contacts; eliminates product wear
- Noncontact position sensing

### Description

The SR16 Series Hall effect vane sensors are designed for position and speed sensing and are available in three termination variations. The cost effective SR16 Series sensors are tailored for fitness and information technology applications. They are well suited for use in moderate electrical, chemical, and mechanical environments.

The SR16 Series sensors contain an internal magnet and Hall effect sensor mounted in a twin tower configuration. In application, a customer supplied ferrous target passes between the tower gap, interrupts the magnetic field, and switches the digital state of the sensor.

These robust solid state Hall effect sensors are housed in an environmentally sealed plastic package. The Hall effect sensors provide highly accurate and repeatable performance in environments in which dirt, dust, or stray IR light might affect the performance of optical solutions. The sensor package is constructed of rugged polyphthalamide material and is mechanically interchangeable with our standard optical sensors.

### Product Specifications

<b>Product Type</b>	Competitively Priced Hall Digital Vane Sensor
<b>Package Style</b>	Dual Tower wire exit
<b>Supply Voltage</b>	3.8 Vdc to 30.0 Vdc
<b>Output Type</b>	Sink
<b>Termination Type</b>	26-gauge 7-strand lead wire
<b>Operating Temperature Range</b>	-20 °C to 85 °C [-4 °F to 185 °F]
<b>Output Voltage</b>	0.4 Vdc max.
<b>Vibration</b>	10 g/10 Hz to 500 Hz
<b>Humidity</b>	95 %RH/40 °C 100 h
<b>Vane and Geartooth Target Material</b>	Low Carbon Steel, High Permeability, Low Residual Induction

<b>Sealing</b>	Sealed SS4 package
<b>Availability</b>	Global
<b>Comment</b>	For minimum tooth measurement, reference recommended target on drawing.
<b>Supply Current (max. @ 25 °C)</b>	10 mA
<b>Output Current (max.)</b>	40 mA
<b>Vane Thickness</b>	1,14 mm [0.045 in]
<b>Minimum Tooth Depth</b>	6,35 mm [0.250 in]
<b>Series Name</b>	SR16 Series

Please contact your regional Honeywell office regarding your product of choice.*

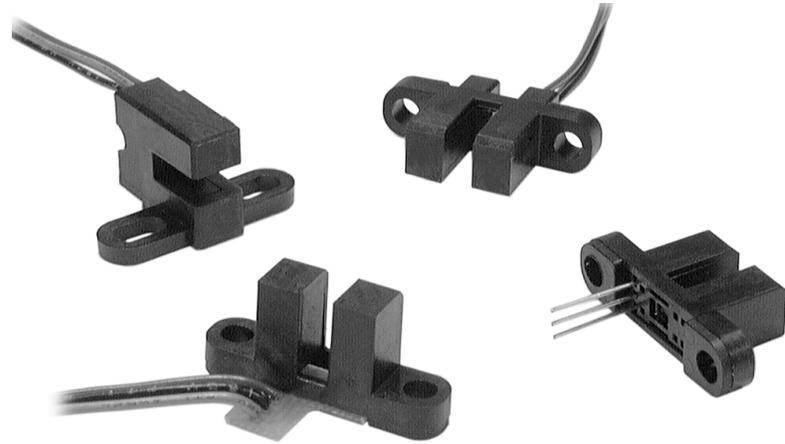

## Solid State Sensors

### SR16/17 Hall Effect Vane Sensors

### SR 16/17 Series

#### FEATURES

- Compact, robust packages
- Mechanically interchangeable with our standard optical style sensors
- Operated by a "Ferrous Vane" interrupter for pulse counting or position sensing
- Current sinking (Open Collector) output
- 3.8 to 30 VDC power supply
- Medium level magnetic switching to reduce stray field interference
- Internally sealed packages for moderate environment applications
- No mechanical contacts; eliminates product wear
- Noncontact position sensing

The SR16/17 Series Hall effect vane sensors, designed for position and speed sensing, offer side mount packages and three termination variations. The cost effective SR16/17 Series sensors are tailored for fitness and information technology applications. They are well suited for use in moderate electrical, chemical, and mechanical environments.

The SR16/17 Series sensors contain an internal magnet and Hall effect sensor mounted in a twin tower configuration. In application, a customer supplied ferrous target passes between the tower gap, interrupts the magnetic field, and switches the digital state of the sensor.

These robust solid state Hall effect sensors are housed in an environmentally sealed plastic package. The Hall effect sensors provide highly accurate and repeatable performance in environments in which dirt, dust, or stray IR light might affect the performance of optical solutions. The sensor package is constructed of rugged polyphthalamide and polycarbonate material and is mechanically interchangeable with our standard optical sensors.

#### **⚠ WARNING**

##### **PERSONAL INJURY**

- DO NOT USE these products as safety or emergency stop devices, or in any other application where failure of the product could result in personal injury.

**Failure to comply with these instructions could result in death or serious injury.**

#### **⚠ WARNING**

##### **MISUSE OF DOCUMENTATION**

- The information presented in this product sheet is for reference only. Do not use this document as product installation information.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

**Failure to comply with these instructions could result in death or serious injury.**

## SR16/17 Hall Effect Vane Sensors

## SR16/17 Series

### ELECTRICAL CHARACTERISTICS -20°C TO 85 °C, 3.8 TO 30 VDC

	Min.	Max.	Remarks
Supply voltage		3.8 to 30	VDC
Current consumption	—	9	mA (off) 10 mA (on)
Output voltage (operated)	—	0.40 V	Sinking 20 mA max.
Sink current (operated)	—	20	mA
Output leakage current (released)	—	10 $\mu$ A	$V_{OUT} = 30$ VDC, $V_{CC} = 24$ VDC
Output switching time			
Rise, 10 to 90%	—	1.5 $\mu$ s	$V_{CC} = 12$ V, $R_L = 1.6$ K $\Omega$ , $C_L = 20$ pF
Fall, 90 to 10%	—	1.5 $\mu$ s	$V_{CC} = 12$ V, $R_L = 1.6$ K $\Omega$ , $C_L = 20$ pF
Operating Temperature	-20°C to +85°C (-4°F to +185°F)		

### MECHANICAL CHARACTERISTICS

Operating Range 12 VDC @ 25°C

Operate	Release
$1.5^\circ \pm 2.0^\circ$	$3.0^\circ \pm 2.5^\circ$

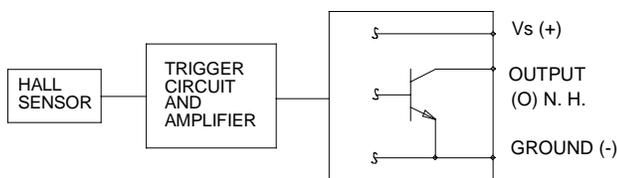

### CONDITIONS

Target engagement distance 0.150 in to 0.300 in

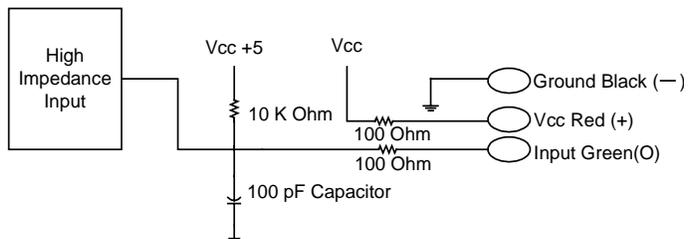

RPMs 0 to 5000

Slot depth 0.250 in min.

#### Notes:

1. Mounting specification: non-ferrous #4 machine head screws with .25 OD washers torqued to 3-5 in-lbs.
2. Suggested target configuration, material: .045 low carbon steel, high permeability, low residual induction.
3. Operate (degrees) is the angular distance from the leading edge of the tooth to the centerline of the sensor.
4. Release (degrees) is the angular distance from the trailing edge of the tooth to the centerline of the sensor.
5. Operating specification is based on target shown.

### **WARRANTY/REMEDY**

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Contact your local sales office for warranty information. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace without charge those items it finds defective. The foregoing is Buyer's sole remedy and is **in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose.**

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use.

While we provide application assistance personally, through our literature and the Honeywell web site, it is up to the customer to determine the suitability of the product in the application.

For application assistance, current specifications, or name of the nearest Authorized Distributor, contact a nearby sales office. Or call:

1-800-537-6945 USA
