# General Description

nuvoton W55RFS27T1B is a fully integrated S-R (Super-regeneration) RF transmitter with full-function of baseband command encoder for application of R/C vehicle, toy, or wireless data communication.

W55RFS27T1B provides both ***uC-mode*** for general purpose of micro-controller programming interface and ***manual-mode*** for RF transmitter as well as 6-function of baseband command encoder.

W55RFS27T1B cooperate with W55RFS27R1B is very easy and convenient to

provide simple remote control function with very low production cost in various application. The transmitter provides the FCC/ETSI regulation provisions for 27M, 35M, 40M, 49MHz S-R (Super-regeneration) modulation. Wide range of operation voltage from 2.2V to 5.5V is suitable for 2-battery or 3-battery R/C toy application, and high efficient transmission output power.

W55RFS27T1B is compliant to FCC part 15 class B and 15.227 / ETSI 300 220-1, making it easier for wireless end products to get FCC and ETSI compliance approval.

## 1.1 Features

- Operating frequency: 27MHz ~ 49MHz
- Wide operating voltage: 2.2V ~ 5.5V
- Transmission data rates up to 10K bps (***uC-mode***) for 30%-70% duty cycle
- High efficiency transmission output power.
- Manual-mode*** supports 6-function of R/C toy baseband control command encoder, i,e, Forward, Backward, Left-turn, right-turn, and 2 user defined function F1 and F2
- High efficient transmission power with minimum current consumption
- Power down current consumption less than 1uA
- Less manual adjustment needed in production
- Fewer external components required in production
- Lower manufacture production cost
- Compliant to FCC part 15 class B and 15.227 / ETSI 300 220-1 low-power & short-range device requirements
- Two input modes for flexibility of more control function and lower component cost
- Dice form available for PCB bonding
- Operating temperature: 0°C ~ 70°C

## 1.2 W55RFS27T1B Pad Definition

### 1.2.1 Pad Description

| Symbol  | Pad No. | I/O    | Functional Description  |
|---------|---------|--------|---|
| S3      | 1       | I      | Manual-mode input, internally pull-high   |
| S4      | 2       | I      | Manual-mode input , internally pull-high  |
| CKSEL0  | 3       | I      | Clock source frequency select LSB (please see section 1.2.2 for setup)                      |
| TEST    | 4       | I      | TEST=0 for 6-function mode, TEST=1 for 4-function mode                                      |
| CKSEL1  | 5       | I      | Clock source frequency select MSB (please see section 1.2.2 for setup)                      |
| ANT     | 6       | O      | RF signal output. An external matching circuit is necessary for connecting with an antenna. |
| GND     | 7       | Ground | Ground return path  |
| VDD     | 8       | Power  | Power path  |
| RESET   | 9       | I      | RESET=0 resets whole chip, internally pull-high   |
| X1      | 10      | I      | Input of internal crystal oscillator to connect with an external crystal                    |
| X2      | 11      | O      | Output of internal crystal oscillator to connect with an external crystal                   |
| ID1     | 12      | I      | ID setting MSB (please see section 1.2.3 for setup)   |
| ID0     | 13      | I      | ID setting LSB (please see section 1.2.3 for setup)   |
| TXOUT   | 14      | O      | TXD Data output   |
| S1/~TXD | 15      | I      | Manual-mode input or uC-mode: ~TXD, internally pull-high                                    |
| S2/~ENB | 16      | I      | Manual-mode input or uC-mode: ~ENB, internally pull-high                                    |

### 1.2.2 Clock Frequency Select (CKSEL) Setup

| (CKSEL1,CKSEL0) | Clock Frequency |
|-----------------|-----------------|
| (0,0)           | 27.145MHz       |
| (0,1)           | 35.48 MHz       |
| (1,0)           | 40.68 MHz       |
| (1,1)           | 49.86 MHz       |

### 1.2.3 uC-Mode & Manual Mode (Baseband Data Rate) Setup

| (ID1, ID0) | Function             | Encoder Time Base   |
|------------|----------------------|---------------------|
| (0,0)      | Data Rate= 2.5KBPS   | T=200us             |
| (0,1)      | Data Rate= 1.25KBPS  | T=400us             |
| (1,0)      | Data Rate= 0.625KBPS | T=800us             |
| (1,1)      | uC- Mode             | External controlled |

(Note: W55RFS27R1B Data Rate=1.25KBPS; W55RFS27R1A Data Rate=2.5KBPS)

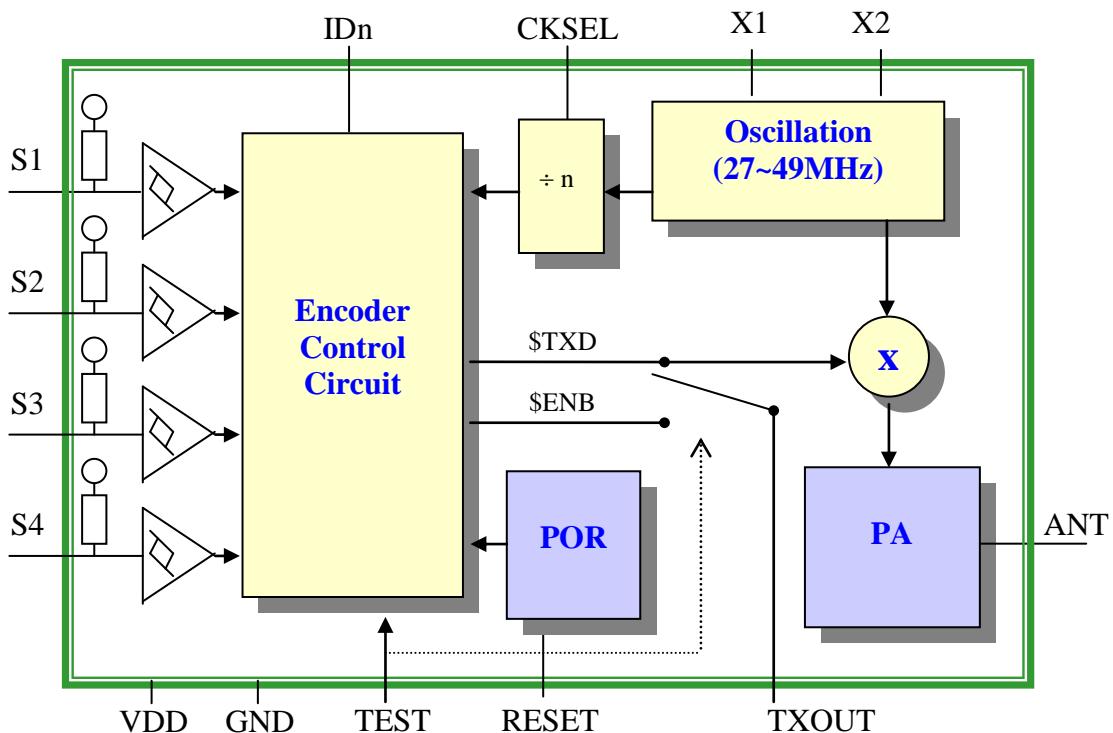

### 1.2.4 Baseband Encoder Control Function Description

| Input pin name | Connect to          | 6-Function<br>(TEST=0)     | 4-Function<br>(TEST=1) |
|----------------|---------------------|----------------------------|------------------------|
| S1             | Default (pull high) | <b>F</b> = 0, <b>B</b> = 0 | <b>F</b> = 0           |
|                | GND                 | <b>F</b> = 0, <b>B</b> = 1 | <b>F</b> = 1           |
|                | TXOUT               | <b>F</b> = 1, <b>B</b> = 0 | -                      |
| S2             | Default (pull high) | <b>F</b> = 0, <b>B</b> = 0 | <b>B</b> = 0           |
|                | GND                 | <b>F</b> = 0, <b>B</b> = 1 | <b>B</b> = 1           |
|                | TXOUT               | <b>F</b> = 1, <b>B</b> = 0 | -                      |
| S3             | Default (pull high) | <b>F1</b> = 0              | <b>L</b> = 0           |
|                | GND                 | <b>F1</b> = 1              | <b>L</b> = 1           |
| S4             | Default (pull high) | <b>F2</b> = 0              | <b>R</b> = 0           |
|                | GND                 | <b>F2</b> = 1              | <b>R</b> = 1           |

(Note: **F** ⇔ Forward; **B** ⇔ Backward; **L** ⇔ Left-turn; **R** ⇔ Right-turn; **F1**, **F2** ⇔ Two User-defined function)

# System Description

## 2.1 W55RFS27T1B System Block Diagram

## 2.2 W55RFS27T1B Functional Description

W55RFS27T1B provides two operation modes for convenient remote control product development, named ***Manual-mode*** and ***uC-mode***. The ***Manual-mode*** provides a powerful baseband command encoder, which performs 6-function

binary data encode and, modulate with the on-chip RF power amplifier to transmit control command. The control function can be at most to 6 functions, Forward, Backward, Left-turn, Right-turn for

general R/C-vehicle control and 2 other user-defined functions **F1** and **F2**.

It is very suitable for remote control applications if W55RFS27T1B and its associated receiver/decoder W55RFS27R1B are adopted. The very pair provides extremely low-cost and high-performance function for design of various remote-control applications.

The ***uC-mode*** provides digital interface for external micro-controller to control the transmitter easily and efficiently. The micro-controller only need two pins, ***TXD*** (S1) to send data and ***ENB*** (S2) to enter power down mode, if needed.

The transmitter provides the FCC/ETSI regulation provisions for 27M, 40MHz and 49MHz S-R (Super-regeneration) modulation. Wide range of operation voltage from 2.2V to 5.5V is suitable for 2-battery or 3-battery R/C toy application, and 15dBm high efficient transmission output power.

W55RFS27T1B Super-regeneration RF transmitter is compliant to FCC part 15 class B and 15.227 / ETSI 300 220-1, making it easier for wireless end products to get FCC and ETSI compliance approval.

## Electronic Characteristics

### 3.1 W55RFS27T1B Absolute Maximum Ratings

| Parameter  | Rating       | Unit               |
|--|--------------|--------------------|
| Supply Voltage to Ground Potential               | - 0.3 to 6.5 | V                  |
| Applied Input/Output Voltage                     | - 0.3 to 6.5 | V                  |
| Power Dissipation ( $T_a = 70^{\circ}\text{C}$ ) | 150          | mW                 |
| Ambient Operating Temperature                    | 0 to 70      | $^{\circ}\text{C}$ |
| Storage Temperature                              | -40 to 85    | $^{\circ}\text{C}$ |

**Note:** Exposure to conditions beyond those listed under Absolute Maximum Ratings may adversely affect the life and reliability of the device.

### 3.2 W55RFS27T1B DC Characteristics

(VDD-VSS = 3 V,  $T_a = 25^{\circ}\text{C}$ ; unless otherwise specified)

| Parameter    | Sym. | Conditions | Min. | Typ. | Max. | Unit |
|--------------|------|------------|------|------|------|------|
| Power Supply |      |            |      |      |      |      |

|  |                  |  |                     |      |                     |      |
|--|------------------|--|---------------------|------|---------------------|------|
| Operating Voltage  | V <sub>DD</sub>  |  | 2.2                 | -    | 5.5                 | V    |
| Operating Current (uC-mode)  | I <sub>TX</sub>  | Continuous emission                    | -                   | -    | 50                  | mA   |
| Stand-by Current   | I <sub>SBY</sub> |  | -                   | -    | 1                   | μA   |
| <b>Digital Input/Output Pin (S1, S2, S3, S4, ID0, ID1, MODE, CKSEL0, CKSEL1)</b> |                  |  |                     |      |                     |      |
| Input High Voltage   | V <sub>IH</sub>  |  | 0.8*V <sub>DD</sub> | -    | V <sub>DD</sub>     | V    |
| Input Low Voltage  | V <sub>IL</sub>  |  | V <sub>SS</sub>     | -    | 0.1*V <sub>DD</sub> | V    |
| Input Pin Pull-high Resistance   | R <sub>PH</sub>  | S1~S4, RESET                           | -                   | 150K | -                   | ohm  |
| TXOUT Output High Source Current   | I <sub>OH</sub>  | V <sub>OH</sub> =0.7 * V <sub>DD</sub> | 6                   | -    | -                   | mA   |
| TXOUT Output Low Sink Current  | I <sub>OL</sub>  | V <sub>OL</sub> =0.3 * V <sub>DD</sub> | 6                   | -    | -                   | mA   |
| <b>Crystal Oscillator</b>  |                  |  |                     |      |                     |      |
| Operation Frequency  | F <sub>XTL</sub> |  | 27                  | -    | 49                  | MHz  |
| Oscillator Turn-On Time  | T <sub>OSC</sub> | Fundamental type                       | -                   | -    | 1.0                 | mS   |
|  |                  | Over-tone type                         | -                   | -    | 3.0                 | mS   |
| <b>Transmitter Section</b>   |                  |  |                     |      |                     |      |
| Modulation Duty Cycle  | M <sub>DYT</sub> |  | 30                  | 50   | 70                  | %    |
| Transmission Data Rate   | R <sub>DTT</sub> | 50% Duty-cycle Manchester Code         | -                   | 1.25 | 10                  | Kbps |
| Transmission Power   | P <sub>ANT</sub> |  | -                   | 15   | -                   | dBm  |

Notes: (1). Crystal turn-on time depends on crystal type: fundamental or overtone type crystal.

(2). Transmitter settling time depends on crystal type: fundamental or overtone type crystal.

### 3.3 W55RFS27T1B Ordering Information

W55RFS27T1B provides two forms in shipment: Dice form, and wafer form

| Part Number    | Package    | Remarks |
|----------------|------------|---------|
| W55RFS27T1B(H) | Dice form  | -       |
| W55RFS27T1B(W) | Wafer form | -       |

## 3.4 W55RFS27T1B Package Information

#### 4.1.3 Application Circuit for 4 Control Functions

Set TEST = 1,

1. Only 4 control functions provided
2. No need to add external power switch when use 9V battery.
3. LED can be directly driven by TXOUT

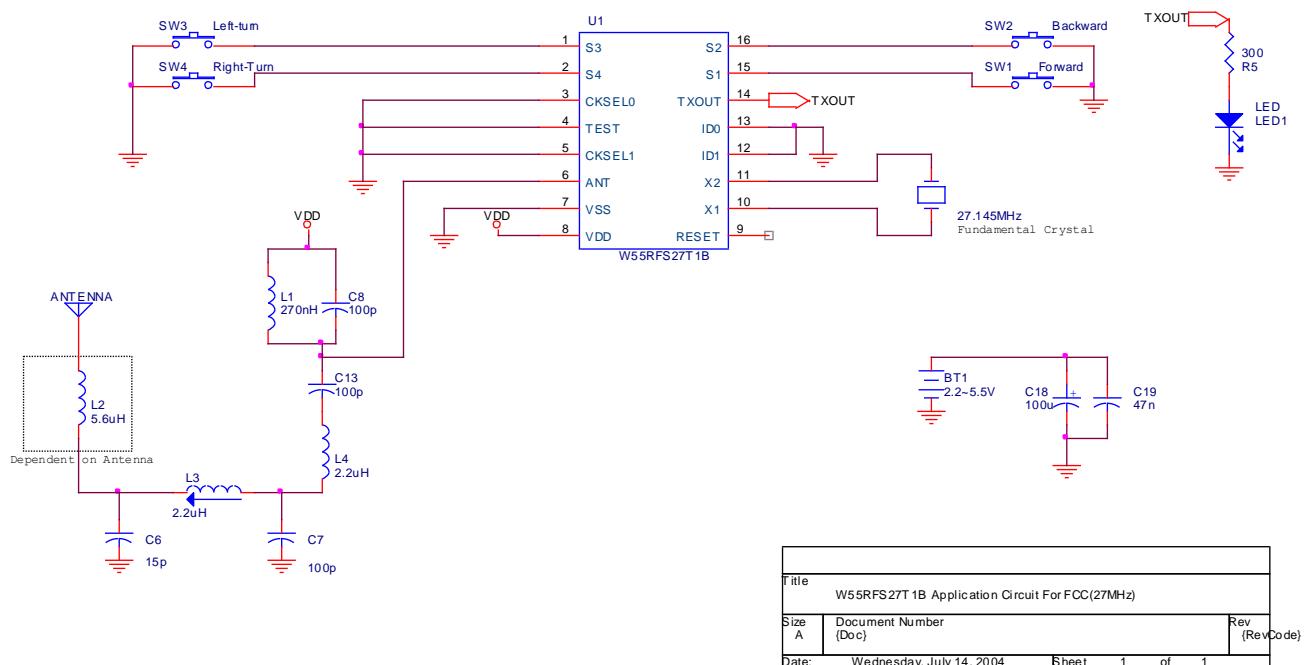

- \* 27MHz, (L1, C7) = (5.6nH, 470pF), (L7, C33)=none
- \* 35MHz, (L1, C7) = (47nH, 360pF), (L7, C33)=(3.3uH, 47n)
- \* 40MHz, (L1, C7) = (47nH, 300pF), (L7, C33)=(2.2uH, 47n)
- \* 49MHz, (L1, C7) = (39nH, 240pF), (L7, C33)=(1uH, 47n)

#### 4.1.4 Application Circuit for FCC

#### 4.2 uC-Mode Control Signal

## 4.3 W55RFS27T Family FCC Certification

Report No. 034H059FI

### Test Report Certification

Test Date : Apr. 22, 2003  
Report No. : 034H059FI

Product Name : 27/49 MHz Radio Transmitter  
Applicant : Winbond Electronics Corp.  
Address : No.4, Creation Rd. III Science-Based Industrial Park Hsinchu, Taiwan, R.O.C.  
Manufacturer : Winbond Electronics Corp.  
Model No. : W55RFS27T  
FCC ID. : ID2-W55RFS27T  
Rated Voltage : DC 4.5V(Power by Battery)  
Trade Name : Winbond  
Measurement Standard : FCC Part 15 Intentional Radiators for Subpart C  
Paragraph 15.227  
Measurement Procedure : ANSI C63.4:1992  
Test Result : Complied

The Test Results relate only to the samples tested.

The test report shall not be reproduced except in full without the written approval of QuiTek Corporation.  
This report must not be used to claim product endorsement by NVLAP any agency of the U.S. Government

## 4.4 W55RFS27T1B Data Sheet Document History

| Revision | Date      | Description             |
|----------|-----------|-------------------------|
| A1.0     | May 2004  | Preliminary version     |
| A2.0     | Jul. 2004 | Formal released version |
| A3.0     | Feb. 2010 | Logo Changed            |

### Important Notice

Nuvoton Products are neither intended nor warranted for usage in systems or equipment, any malfunction or failure of which may cause loss of human life, bodily injury or severe property damage. Such applications are deemed, "Insecure Usage".

Insecure usage includes, but is not limited to: equipment for surgical implementation, atomic energy control instruments, airplane or spaceship instruments, the control or operation of dynamic, brake or safety systems designed for vehicular use, traffic signal instruments, all types of safety devices, and other applications intended to support or sustain life.

All Insecure Usage shall be made at customer's risk, and in the event that third parties lay claims to Nuvoton as a result of customer's Insecure Usage, customer shall indemnify the damages and liabilities thus incurred by Nuvoton.
