

1.8 WATT REGULATED DC/DC CONVERTER

PWR60XX

FEATURES

- Low Cost
- Low Noise
- Industry-Standard Package
- Single and Dual Outputs
- High Isolation Voltage Option Available
- Linear Output Regulation
- Internal Input and Output Filtering
- Low EMI Transformer Design
- No External Components Required
- Thermal Shutdown Protection

DESCRIPTION

The PWR60XX Series offers a low-cost alternative for some of the most popular DC/DC converters industry wide. Each model has very low noise and an outstanding MTTF. The superior reliability, excellent filtering, and low cost make it an excellent choice for industry-standard usage.

The series includes eleven models (other input and output voltages are available upon request), all set in an encapsulant for excellent thermal dissipation for internal components. The use of surface-mount devices and manufacturing processes combined with the encapsulation process, provides the user a product that is more environmentally rugged.

The PWR60XX has full isolation between input and output to give the designer maximum flexibility in grounding options and polarity configurations. The outputs are protected against shorts to increase the units survivability in harsh environments.
