FocalPoint® Mobile Workstation

Description

The Gamewell-FCI, FocalPoint® Mobile Workstation is a Tablet PC-based graphic user interface that connects to the 7200, 7100, E3 Series®, and 600 Series product lines of fire alarm control panels via the Gateway interface. It can be connected to a proprietary or shared TCP/IP network. The FocalPoint Mobile workstation is a military spec tablet PC that is designed to survive in harsh conditions. The tablet displays fire alarm control panel network events in real time, in both text and graphic modes. One FocalPoint Mobile workstation can monitor multiple FocalPoint Gateways which can be connected to the following systems:

- Standalone 600 Series
- Standalone E3 Series
- Standalone 7100
- 7200 Series
- 600 Series Networks
- E3 Series Networks
- 7100 NetSOLO® Networks

The FocalPoint workstation supports a broad scope of commercial, industrial and institutional applications. The workstation can be configured to monitor multiple systems installed in remote locations to meet facility requirements of multi-building complexes.

The workstation is designed as a mobile decision support tool by facilities management, security and emergency responders. This workstation uses graphic images to display information that allows personnel to quickly evaluate the emergency and make prompt and informed decisions. From a single screen, a workstation operator can:

- Magnify the facility map using "zoom in" and "zoom out" feature to view floor plans or identify the location and type of multiple events.
- System screen synchronization - Keeps all workstations on the system up to date.
- Monitor remote site activity and link multimedia (text, audio, video, and graphic files) to any device.
- View the event history log on the same screen as the facility floor plans to evaluate the sequence of events.
- Display History manager records for operator, event, and response (with time and date stamp to disk).

FocalPoint®, E3 Series® and NetSOLO® are registered trademarks of Honeywell International Inc.

Microsoft® Windows® is a registered trademark of Microsoft® Corporation.

Intel® is a registered trademark of Intel® Corporation.

Tablet PC-Based Graphic User Interface

FocalPoint Mobile Workstation

Features

- User friendly setup - import floor plans as Windows® graphic bitmaps or Windows graphic met files.
- Secure access - security profiles provide multiple levels of access to different users.
- Improved system maintenance - reports and logs trouble events.
- Automatic screen navigation - (selectable for each device) that locates and zooms to the device related to an alarm event, based on the priority of the event.
- Information labels - Identify hazardous material (HAZMAT) and handicapped accessible areas using fully linked multimedia.

FocalPoint Mobile Workstation:

Use this mobile graphic workstation to evaluate complex situations and quickly make strategic decisions when monitoring the fire alarm control system. During an emergency, where information must be evaluated in seconds, using a small LCD screen to navigate a fire alarm control panel is arduous and time-consuming. The FocalPoint Mobile Workstation greatly simplifies the management of medium to large size fire alarm control systems. Operators can use this workstation to view the status of multiple fire alarm systems outside of the affected area which increases safety to responders, and gives the decision makers a better view of the whole incident.

Specifications

- Portable 1.1 GHz tablet PC with 1 GB RAM, 40 GB HDD, 55 Wh Battery with Tablet, Integrated Cellular Broadband, Integrated 802.11abg (CCX & Wi-Fi Certified), Integrated Bluetooth, USB 2.0 Ports x 2, RJ-45 Ethernet Port, CRT Port, Microphone Port, Speaker Port
- 10.4" XGA Transmissive Sunlight/Indoor/Outdoor Readable display, active digitizer and pen
- UL1604 (Class I, Div 2), Atex (Zone 2, Category 3), IP 67 (up to 30 cm), AC power adapter and North American power cord
- Microsoft Windows® XP Tablet PC edition
