

Quick Reference Guide

Express Mini Card and Display Mini Card Sockets

TE Connectivity's (TE) express mini card and display mini card sockets address interconnect requirements for expansion cards added on boards across server, desktop, consumer devices and notebook platforms. This product portfolio consists of right angle, surface mount sockets with 52 contacts (express mini card) or 76 contacts (display mini card). Latches are available for selected heights. The design meets the PCI-SIG industry standard for high speed data transmission.

FEATURES & BENEFITS

- Sockets available in heights from 4mm to 10.6mm
- Capable of withstanding 50G mechanical shock testing
- Contact manufacturing method creates a contact with more stable normal force than other methods
- Compliant with PCI-SIG standard

APPLICATIONS

- Notebook PC
- Desktop PC
- Wireless Communication Equipment

PCI-SIG is a trademark.

Product Sizes

TE Connectivity's express mini card is fully compatible with PCI express mini card specification.

TE Connectivity's display mini card is fully compatible with PCI express mini card, HDMI and displayport specification.

CONNECTOR PIN-OUT DEFINITIONS (FOR BOTH DISPLAY AND EXPRESS MINI CARD)

Latches for Express Mini Card Sockets

1717832-2	N/A	.157 in [4.00 mm]			
1827682-1	N/A	.276 in [7.0 mm]			

Frequently asked questions

Question 1

Will express mini card connectors replace existing mini PCI connectors?

Answer 1

The trend will be to move towards express mini card, but mini PCI will still be used for some time.

Question 2

Is a latch required when using this connector?

Answer 2

TE Connectivity does offer latches for the 4mm and 7mm connectors, but many customers manufacture their own standoffs.

Question 3

When would I use the DMC (Display Mini Card) connector instead of the express mini card?

Answer 3

If you need a wireless display option, you would use the DMC connector.
