

## Surface Mount 15,000 Watt Transient Voltage Suppressor

High-Reliability  
screening available in  
reference to  
MIL-PRF-19500

### DESCRIPTION

These high power 15 kW rated transient voltage suppressors in a surface mount package are provided with design features to minimize thermal resistance and cumulative heating. Typical applications include lightning and automotive load dump protection. They are particularly effective at meeting the multi-stroke lightning standard RTCA DO-160, section 22 for aircraft design. This efficient low profile package design is offered in standoff voltage selections ( $V_{WM}$ ) of 7 volts to 200 volts in either unidirectional or bidirectional construction.

**Important:** For the latest information, visit our website <http://www.microsemi.com>.
